

## FAQ's

**1. What is the process for changing the member ACC Code from 100 to 105 while member is on Sea Duty?**

- A. The command must submit an availability (AVAIL) for member to PERS-454 (PREGAVAIL-TLD.fct@navy.mil) and they will get the orders processed for the member. Members will be given ACC 105 orders. If an avail is not received within seven days, PERS-454 may generate an avail on behalf of the command.

**2. What is the process for changing the member ACC Code back to 100 from 105?**

- A. Once the member has completed the required periods of LIMDU, the servicing MTF will input a NAVMED 6100/6 in LIMDU SMART. Once the NAVMED 6100/6 is completely signed and no longer in draft status, PERS-454 will then take action to change the ACC to 100 and submit an return-to-duty AVAIL for the member if necessary.

**3. How long does it take for the detailee to cut orders for members going LIMDU from Sea Duty?**

- A. The process can typically take up to three weeks depending on if the AVAIL is submitted within the one week timeframe.

**4. What is the purpose of the Deployability Coordinator?**

- A. The Deployability Coordinator is a close liaison between parent command and MTFs. They are critical in ensuring accurate accounting, tracking, medical treatment, and expeditious movement of LIMDU personnel through the transient pipeline.

**5. Will LIMDU prohibit personnel from requesting separation, retirement, or transfer to Fleet Reserve?**

- A. No.

**6. Is my command required to have a Deployability Coordinator even though we are an operational command?**

- A. Yes

**7. What information does PERS-454 need for my deployability coordinator designation letter?**

- A. If you are sending a Deployability Coordinator designation letter to PERS-454, please include the Deployability Coordinator last name, first name, rank as applicable, email address, phone number, command, and all UICs the deployability coordinator is responsible for to mill\_DAOPer-454@navy.mil.

**8. Am I still required to send all of my LIMDU personnel's paperwork through TOPS to get their status updated?**

- A. No, all LIMDU documentation is filtered to PERS-454 through the MTF and the LIMDU personnel tracking system.

**9. If a member has an expired LIMDU case, will the member be returned to duty?**

- A. Possibly; member's LIMDU cases should be reviewed for disposition (e.g., return to duty, LIMDU extension, referral to PEB, etc.) 30 days prior to LIMDU expiration. If a member is in an expired LIMDU case, PERS-454 will review the case, and, if not corrected by the MTF, PERS-454 may avail the member, change their ACC to 100, and the member may receive orders. To prevent problems in this case, it is highly recommended that military medical treatment facilities close LIMDU cases before or as soon as possible after a LIMDU expiration.

**10. Will PERS-454 change ACCs for LIMDU personnel that are referred to DES or undergoing a PEB?**

- A. No, these personnel will still have their documentation sent to the servicing PSD for update and disposition.
