

CWO 7801 (OCEANOGRAPHY)

DESIGNATOR DESCRIPTION

Oceanography Technicians serve as officer technical specialists in the fields of meteorology, oceanography, and hydrography. They supervise, train and direct oceanography personnel in collecting, processing, analyzing, exploiting, and disseminating Meteorological and Oceanographic (METOC) data. They plan and manage the employment of resources, equipment, and manpower.

They may serve as watch officers, division officers, training officers, team leads for small deployable teams, officers-in-charge of detachments, and technical advisors on various staffs.
