1. Requirements

a. In order to receive the qualification of instructor/observer inside a low pressure chamber:

(1) **Officers** must complete a course of instruction leading to the aerospace physiologist (NOBC-0849) designation.

(2) **Enlisted** members must complete a course of instruction leading to Navy enlisted classification L07A, aerospace physiology technician.

b. Both officers and enlisted members must be under orders to act in the capacity of an instructor/observer inside a low pressure chamber.

2. Temporary Qualifications

a. Authorization for temporary qualifications are made when aviation physiology training activity manning levels are less than authorized and training schedules appear to be in jeopardy.

b. Chief, Bureau of Medicine and Surgery (BUMED) (AERO MED) shall establish the criteria for temporary qualifications.

c. Written request for temporary qualifications should be sent to Chief, BUMED (AERO MED) for approval.
