-------------------	--

1. **Purpose.** To establish qualification requirements and assignment policy for Sailors ordered to Navy Expeditionary Logistics Support Group (NAVELSG) type 2 sea duty components consisting of Navy expeditionary logistics regiments (NELR) and Navy cargo-handling battalions (NCHB). This article applies to all Navy officer and enlisted members of the Active Component (AC), Training and Administration of the Reserves (TAR), and Selected Reserve (SELRES).

2. **Program Background.** NAVELSG regiments and battalions are responsible for providing combatant commanders with mission ready, rapid world-wide deployable forces that are fully capable of executing a complete spectrum of missions such as maritime cargo handling, expeditionary ocean and air terminal operations, expeditionary fueling capabilities, expeditionary support services, personnel and equipment defensive capabilities, and other specialty missions.

#### 3. **Screening**

a. **AC and TAR.** For AC and TAR Sailors, the responsibility for NAVELSG billet screening lies with the Sailor's parent command.

b. **SELRES**. For SELRES Sailors, the gaining NAVELSG command is responsible for the completion of applicable screening requirements. NAVELSG will submit requests for transfer of de-screened SELRES Sailors to Commander, Navy Reserve Forces Command (COMNAVRESFORCOM) via a personnel move request per reference (a).

4. **Screening Requirements**. Navy expeditionary operations often require aggressive training programs to prepare personnel to perform mission essential, high-risk tasks in various environments. Members must satisfactorily complete screening requirements per [MILPERSMAN 1300-800](#), with special attention given to reference (b), enclosure (3).

a. **Alcohol**. Members must not have had any alcohol-related incidents within the past 24 months. Waivers may be granted on a case-by-case basis. Waiver requests must contain full justification, be formally and favorably endorsed by the parent command, and forwarded to NAVELSG.

b. **Psychotropic Medication**. Medications capable of affecting the mind, emotions, and behavior are considered psychotropic. These medications are commonly prescribed to alter chemical levels in the brain, which impact mood and behavior. Conditions that are frequently treated using these types of medication include depression, anxiety, attention deficit hyperactive disorder, bipolar, and other mental disorders. Use of these medications is not necessarily a disqualifying factor. All prescribed medications need to be listed on [NAVMED 1300/1](#) Medical, Dental, and Educational Suitability Screening for Service and Family Members per reference (b) and forwarded to NAVELSG's Medical Department for suitability determination. Members taking medications that cannot be prescribed for more than 30 days at a time will be disqualified. Members with conditions that are required to be assigned within 50 miles of a medical treatment facility will not be considered.

#### 5. **Tour Length**

a. **AC and TAR**. Enlisted personnel assigned to billets onboard NAVELSG type 2 sea duty components are required to complete a full sea-shore flow tour (AC), prescribed sea tour (TAR), or 48 months, whichever is greater.

b. **SELRES**. SELRES enlisted personnel do not utilize the sea-shore flow assignment policy and must adhere to COMNAVRESFORCOM assignment policy per reference (a).

6. **Requirements and Qualifications**. The requirements and qualifications contained in this article apply to officer and enlisted personnel being screened for permanent change of station assignment to NAVELSG regiments or battalions, unless stated otherwise. Prospective members must meet the following requirements:

a. **Physical Standards**

(1) Regiment and battalion training and mission requirements are arduous and require members to operate in austere environments while wearing heavy body armor and or carrying significant loads of field equipment and or weapons for long periods. Sailors must not have any physical condition(s) that would preclude them from meeting this requirement (e.g., chronic back or shoulder injuries, knee injuries, etc.). Transferring commands are directed to ensure servicing medical organizations complete and pay special attention to the requirements contained in reference (b), enclosure (3). For questions concerning individual cases or further screening information, contact NAVELSG's Medical Department at (757) 256-1375.

(2) Members must have passed all physical fitness assessments (PFA) within the last 2 years (not applicable to new accessions and recent "A" school graduates who have not participated in PFAs). New accessions and recent "A" school graduates must have passed most recent PFA per reference (c) prior to assignment. Members being released from a period of limited duty must complete and pass a PFA (with no waiver for any event) before transferring to their prospective commands.

b. **Government Passport**. Members will be required to obtain an official U.S. Government passport. Any circumstances preventing a member from obtaining a Government passport is disqualifying. Members who lose the ability to retain a Government passport while assigned will be "de-screened" and the transfer process will be initiated. Fees incurred are reimbursable.

c. **Security Clearance**. Members must be eligible for a secret clearance. It is recognized that the majority of first-

term members reporting from initial schools will not have a finalized clearance determination; however, an investigation must be opened and initial screening completed prior to transfer. In these cases, it is incumbent that the training command ascertains any issues that would preclude a member from being granted a clearance and for commanding officers to determine whether the member should continue assignment onboard an NELR or NCHB. Members currently assigned to either NELRs or NCHBs who have their secret clearance removed or revoked by the Defense Counterintelligence and Security Agency, or other appropriate authority, will no longer be eligible for continued assignment. Those members will be "de-screened", and their transfer process will be initiated.

d. **Driver's License**. Members must possess a valid State driver's license or obtain one within 6 months of reporting.

e. **Non-Judicial Punishment (NJP) and Military or Civilian Convictions**. Members must not have any NJP or military or civilian convictions, excluding minor traffic violations, within the past 12 months. Waivers may be granted on a case-by-case basis. Waiver requests must contain full justification and must be formally and favorably endorsed by the member's parent command. Forward waiver requests to NAVELSG.

f. **Obligated Service (OBLISERV)**. Reference (d) details required OBLISERV for AC and TAR assignments to this program. Per subparagraphs 5a and 5b of this article, the minimum required tour length is 48 months or normal sea tour, whichever is greater. Members with 17 or more years of active service will not be authorized voluntary transfer to the Fleet Reserve or Retired List prior to the completion of a minimum 36-month tour. A [NAVPERS 1070/613](#) Administrative Remarks entry will be made, certifying the member understands and agrees to this requirement.

(1) Split tours requiring transfer prior to 36 months are not authorized.

(2) Members who will meet high year tenure prior to 36 months on board will not be considered for this assignment.

(3) SELRES members will be assigned per reference (a).

g. **Financial**. Members must qualify for and maintain eligibility for a Government Travel Charge Card (GTCC). It is

recognized that the majority of first-term members reporting from initial schools will not have been issued a GTCC. In these cases, the training command must ascertain any issues that would preclude a member from being issued a GTCC and for commanding officers to determine whether the member should continue assignment onboard an NELR or NCHB.

h. **Firearms**. NELR and NCHB personnel must achieve and maintain qualifications on various individual and crew-served weapons systems. Per reference (d), section 992(g)(9), the 1996 Lautenberg Amendment to the Gun Control Act of 1968 prohibits access to firearms by persons convicted of a misdemeanor crime of domestic violence. This policy also applies to convictions of felony crimes and convictions of offenses at general or special courts-martial that otherwise meet the definition of "crime of domestic violence." Any member disqualified from handling or training on weapons for any reason is not eligible for initial entry or continued duty onboard any NELR or NCHB.
