-------------------	--

1. **Policy**. Officers and enlisted members assigned to duty as firefighting instructors will be medically examined under physical qualification standards and physical examination requirements set forth in reference (a). Such examination will be conducted prior to the commencement of duties that expose the member to toxic fumes or inhalation of smoke or to the possibility of such exposure, and at least annually thereafter while assigned to firefighting instructor positions. The time interval for local rotation of firefighting instructors between duties involving exposure and nonexposure to smoke within a school or training center is to be determined by the commanding officer or the officer in charge and upon the recommendation of the medical officer or senior medical department representative.
