| Reference | (a) NETC P1552/16 Navy Swimming and Water Survival Instructor Manual (07-17) |
|------------------|--|

1. **Safety Requirements**. Swimmer qualification safety requirements are as prescribed in reference (a), chapter 12.
2. **Minimum Qualifications**. The minimum water survival qualification for service in the Navy is swimmer third class. Personnel unable to qualify as swimmer third class at officer and enlisted accession schools should be recycled or held back for a maximum of 3 weeks to achieve this qualification.
3. **Swimmer Qualification Tests**. Third, second, and first class swimmer qualification tests will be administered and graded per reference (a), chapters 12 and 13.
4. **Fleet Training Management and Planning System (FLTMPS) Documentation**. The command training officer will ensure entry of first and or second class swim tests in the Fleet Training Management and Planning System (FLTMPS) and in the Service member's service record upon receipt of appendix G, NETC P1552/16 - Record of Swim Qualification, provided to Service member by the swim tester. See reference (a), page 12-7 for FLTMPS entry requirements.

Note: Completion of swimmer third class is a required event for all Navy accession schools. Therefore, verification is generally not required in FLTMPS.
