#### NAVY ENLISTED OCCUPATIONAL STANDARD

FOR

NAVAL AIRCREWMEN (AVIONICS) (AWV)

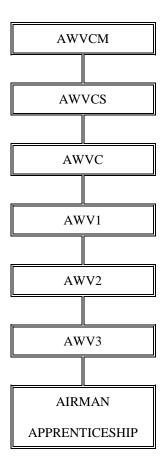

#### SCOPE OF RATING

<u>Naval Aircrewmen (Avionics) (AWV)</u> are members of a fixed wing integrated tactical aircrew aboard maritime patrol and reconnaissance and command and control aircraft; knowledgeable of all mission and flight avionics systems, safety equipment, emergency procedures and aircraft equipment; perform primary in-flight and ground duties as aircraft In-Flight Technicians and Airborne Communication Technicians who maintain and operate aircraft systems; pilot and maintain Unmanned Aerial Vehicles (UAV); operate aerial photographic equipment; maintain and operate strategic and tactical communications; handle, store and retrieve incoming and outgoing messages; build, configure, deploy, operate and maintain information technology, networks and capabilities; perform network system administration, maintenance, and training; and perform maintenance and aircrew administration, flight and ground training, ordnance handling duties, joint special warfare operations and Communications Material Security (CMS) handling.

This Occupational Standard is to be incorporated in Volume I, Part B, of the Manual of Navy Enlisted Manpower and Personnel Classifications and Occupational Standards (NAVPERS 18068F) in Chapter 12.

## GENERAL INFORMATION CAREER PATTERN

Normal path of advancement to Chief Warrant Officer and Limited Duty Officer categories can be found in OPNAVINST 1420.1.

For rating entry requirements, refer to MILPERSMAN 1306-618.

# <u>SAFETY</u>

The observance of Operational Risk Management (ORM) and proper safety precautions in all areas is an integral part of each billet and the responsibility of every Sailor; therefore, it is a universal requirement for all ratings.

#### Job Description

Airborne Communication Technicians are members of fixed wing integrated tactical crews aboard E-6B aircraft; perform duties as in-flight communications system operators; knowledgeable of naval communications procedures and cryptographic materials, aircraft systems, emergency procedures, maintain and operate strategic and tactical communications; handle, store, and retrieve incoming and outgoing messages; build, configure, deploy, operate, and maintain information technology, networks and capabilities; perform network system administration, maintenance, and training, fault isolation and component repair of all mission and flight avionics equipment on E-6B aircraft; contribute to aircrew operations, training, and administration; and attain and maintain the squadron's aircrew qualifications and certifications. Must be eligible for a final Top Secret security clearance, SCI and PRP.

#### Job Description

Aircrew Readiness Managers (Avionics) are crucial and integral members of staffs, operational commands, and squadrons; coordinate the operational, administrative, and aircrew scheduling functions for the organization; administer and manage training programs and resources for naval aircrew; manage standardization of aircrew training programs to enhance proficiency and readiness, and coordinate all aspects of aircrew training to meet the rigorous demands of operational commitments worldwide; administer and direct the Naval Air Training and Operating Procedures Standardization (NATOPS) and Search And Rescue (SAR) programs; administer and direct tactics, training and readiness, ordnance and weapons, and aircrew training. As program managers, they analyze training resource requirements, review and approve contract options for new training devices and programs, develop and revise curriculum, incorporate and initiate new aircrew training programs, manage student quotas, qualifications and certifications, and coordinate aircrew physical fitness and health program initiatives.
