## INTRODUCTION

### THE ENLISTED RATING STRUCTURE, NAVAL STANDARDS AND OCCUPATIONAL STANDARDS

The Navy Enlisted Occupational Classification System (NEOCS) provides the means by which all Navy enlisted personnel are classified. To support enlisted personnel planning, procurement, training, promotion, distribution, assignment, and mobilization within that classification system, the Navy has established specific standards. The standards define minimum skill and knowledge requirements for enlisted personnel at each paygrade and within each career field.

1. Volume I, Part A of this manual contains an introductory overview of NEOCS, an explanation of Naval Standards (NAVSTDs) and Occupational Standards (OCCSTDs), and pertinent appendixes.
2. Volume I, Part B of this manual contains individual chapters with the OCCSTDs for each rating. Refer to Volume I, Part B, Cover Page for a listing of current chapters and revisions.
3. Volume II of this manual contains an explanation of the Navy Enlisted Classification (NEC) structure, a listing of those NECs and related appendixes.
4. The standards and classifications in Volume I and II are important to all Navy personnel and commands. Familiarity with these standards and classifications will provide enlisted personnel and commands with a better understanding of an important part of the training, advancement, and distribution systems.

## NEOCS OVERVIEW

The Navy Enlisted Occupational Classification System (NEOCS) consists of (1) the enlisted rating structure and (2) its supplement, the NEC structure. Special qualifications further complement both the enlisted rating structure and NEC structure. These special qualifications, found in the *Naval Military Personnel Manual, NAVPERS 15560 series*, identify and define requirements for specialized mission areas which cross broad occupational fields (e.g., submarine qualifications).

1. The enlisted rating structure consists of occupational fields (i.e., broad groupings of similar occupations), ratings (i.e., occupational specialties) and rates (i.e., a paygrade within a rating). This structure provides a framework for enlisted career development and advancement, and is the primary administrative means for classifying and identifying enlisted personnel.

a. The enlisted rating structure provides:

(1) A single, integrated structure for the Navy (Active and Reserve). This structure serves both peacetime and wartime needs and eliminates the need for extensive expansion and conversion of the classification system upon mobilization.

(2) Specialization at appropriate petty officer levels to meet expanding technology, reduce training time, and improve the utilization of first enlistment personnel.

(3) Senior petty officers with broad military and technical qualifications.

b. The Secretary of the Navy approves the establishment and disestablishment of general and emergency ratings and general rates under the authority of Title 10 USC 6013. The Deputy Chief of Naval Operations (Manpower, Personnel, Training, and Education), approves policy and modifications to existing ratings, including the establishment or disestablishment of service ratings. A NEOCS Board assists in the management of the NEOCS and serves as the central point for changes in rates, ratings, jobs, and NEC classifications. OPNAVINST 1223.1 series establishes the NEOCS Board and outlines its objectives, authority, and composition. Volume I, Part A, Appendix A of this manual contains the criteria and guidelines for proposing changes to the enlisted rating structure.

c. The following paragraphs provide a brief description of major components of the enlisted rating structure:

(1) Occupational fields are broad groupings of similar occupations used by manpower, personnel, and training managers to organize the analysis, management, and administration of Navy ratings. Occupational fields are also used to organize career guides and conversion manuals for use by counselors and Department of Defense managers. A listing of the occupational fields and their associated ratings are listed in Appendix B of this manual.

(2) Ratings (general, service, and emergency) are broad enlisted career fields. They identify occupational specialties that encompass related aptitude, training, experience, knowledge, and skills for the purpose of career development and advancement.

(a) General ratings identify personnel from paygrades E-4 through E-9. They provide the primary means of identifying billet requirements and personnel qualifications. Some ratings are combined at paygrade E-8 or E-9 to form broader career fields when the occupational content is similar. This provides for progressively higher levels and scopes of authority and responsibility (e.g., combination of Senior Chief Utilitiesman (UTCS) and Senior Chief Construction Electrician (CECS) to form the Master Chief Utilitiesman (UCCM)).

(b) Service ratings are subdivisions of certain general ratings. They identify required specialization and specific areas of qualifications in the utilization and training of personnel. Service ratings permit optimum utilization of personnel and economy of training.

(c) Emergency ratings are career fields encompassing skills or qualifications which do not require identification by a rating during peacetime, but are required in time of war. Currently, there are no emergency ratings.

(3) Rates identify personnel occupationally by paygrades E-1 through E-9 and they reflect levels of aptitude, training, experience, knowledge, skill, and responsibility. Enlisted rates are divided into three groups: general rates (E-1 through E-3 apprenticeships), petty officers (E-4

through E-6), and chief petty officers (E-7 through E-9).

(a) General rates are apprenticeships assigned to personnel at paygrades E-1 through E-3 to indicate their eligibility for entry into various ratings. These apprenticeships are: Airman (AN), Constructionman (CN), Fireman (FN), Hospitalman (HN), and Seaman (SN).

1. Non-designated Sailors are personnel in paygrades E-1 through E-3 who are not selected to enter a specific rating.

2. Designated Sailors are personnel in paygrades E-1 through E-3 who are identified as apprentices for a specific rating. Designation identifies the rating in which an apprentice has significant skills as a result of on-the-job experience or formal classroom training, and indicates basic occupational skills on a par with the minimum skills for paygrade E-4 in the rating for which identified. A rating abbreviation is added to an apprentice's general rate abbreviation to indicate the rating for which the individual is designated (e.g., a SN who demonstrates significant skills in the Electronics Technician (ET) rating would be designated by the rating abbreviation, ETSN). Details for PACT program are in *Naval Military Personnel Manual, NAVPERS 15560 Article 1306-611*.

(b) Petty Officers (paygrades E-4, E-5, and E-6) are the technicians and work managers within ratings who possess increasing degrees of skill responsibility and authority as they advance in paygrade. Petty officers are capable of accomplishing tasks normal to their rating and paygrade and they provide the "hands on" skills required to maintain, repair, and operate systems and subsystems.

(c) The Chief Petty Officers (CPO) (paygrades E-7, E-8, and E-9).

1. The Chief Petty Officers (CPO) (paygrades E-7) is the technical authority, expert, and supervisor within a rating. The CPO is capable of accomplishing all tasks normal to a rating using technical supervision, instruction, and training of lower rated personnel.

2. The Senior Chief Petty Officer (SCPO) (paygrade E-8) is the senior technical supervisor within a rating or occupational field with primary responsibilities for supervising and training enlisted personnel oriented to system and subsystem maintenance, repair, and operation. Based on wide ranging experience and specialized training, the SCPO provides the command with a higher level of technical and managerial expertise than is expected at the E-7 level.

3. The Master Chief Petty Officer (MCPO) (paygrade E-9) is the senior enlisted petty officer in the United States Navy. As such, the MCPO is vested with special command trust and confidence extending to administrative and managerial functions involving enlisted personnel. Based upon experience, proven performance, and technical knowledge necessary for advancement to the grade of MCPO, individuals of that rate within a command hold the senior enlisted positions

and contribute to forming as well as implementing policy within their occupational field or across the full Navy rating spectrum.

(d) The Command Master Chief (CMDCM) or Command Senior Chief (CMDCS) ratings do not reflect a paygrade higher than E-9/E-8 but does identify the MCPO/SCPO who serves as the senior enlisted advisor to the command in formulating and implementing policies pertaining to the morale, utilization, and training of all enlisted personnel. As such, the CMDCM/CMDCS has direct access to the Commanding Officer. Additionally, the CMDCM/CMDCS is responsible for carrying out established command policy in specific areas as directed by the Commanding Officer and Executive Officer. The CMDCM/CMDCS takes precedence over all enlisted members within a command.

2. The Navy Enlisted Classification (NEC) Structure supplements the enlisted rating structure by identifying a non-rating wide skill/knowledge/aptitude/qualification that must be documented to identify both people and billets for management purposes. Volume II of this manual contains a more detailed explanation of the NEC structure.

3. Enlisted management communities encompass both Navy ratings and NEC codes that individually or as a group form a Navy "community" for management purposes. These communities are used by managers for issues such as the distribution, retention or advancement of personnel. The career paths presented may also serve as a useful guidance tool for individuals planning career decisions.

## STANDARDS

The term Standards as used in this manual is defined as the systematic listing of those minimum capabilities which the Navy expects and requires of individuals with each rating. Standards are generally expressed in terms of task statements (duties and responsibilities) and they represent the abilities, skills, and knowledge needed to accomplish those tasks, duties, and responsibilities. Within the Navy, these standards are divided into two categories: Naval Standards (NAVSTDs) and Occupational Standards (OCCSTDs).

Collectively, these standards occupationally define the work performed by enlisted personnel. Both NAVSTDs and OCCSTDs are developed, revised, and maintained by the Navy Manpower Analysis Center (NAVMAC). NAVMAC coordinates standards revisions Navy-wide. Appendix E is the list of Rating Advisors responsible for reviewing and approving of OCCSTDs. Appendix F of this manual contains the criteria and guidelines for recommending changes to the standards.

1. Naval Standards (NAVSTDs) are standards that generally express the non-rating specific skill and knowledge requirements for enlisted personnel in paygrades E-1 through E-9 (e.g., all E-6 personnel must know how to write enlisted performance evaluations).

a. NAVSTDs together with occupational standards form the basis for implementing and supporting actions for enlisted manning, distribution, recruit training, military requirements training, and advancement.

b. NAVSTDs are stated in the form of skill or knowledge statements to assist enlisted personnel, commanding officers, and personnel managers in identifying the basic military requirements for all enlisted personnel, paygrades E-1 through E-9.

c. NAVSTDs express requirements for skill or knowledge and abilities which individuals must be proficient in even though their present duty assignment may not require the use of that skill or knowledge. Enlisted personnel are required to demonstrate the capability to perform a skill or their attainment of knowledge described by a Naval Standard as part of their advancement process.

d. The more routine skill or knowledge requirements described by NAVSTDs are at the lower paygrades. Those skill or knowledge statements requiring additional experience or involving leadership or supervision are at progressively higher paygrades.

e. NAVSTDs include, at the appropriate paygrades, specific knowledge requirements in the areas of security and safety.

f. The following NAVSTDs format is used in this manual:

(1) They are grouped under Apprentices (paygrades E-2 and E-3) and Petty Officer Third Class (paygrade E-4) through Master Chief Petty Officer (paygrade E-9).

(2) Functional areas are used to provide a standardized grouping of similar NAVSTDs for the various paygrades.

2. Occupational Standards (OCCSTDs) express the Navy's minimum requirements for enlisted occupational skills established by manpower and personnel managers. They, along with NAVSTDs, form the basis for implementing and supporting actions for enlisted manning, distribution, training, and advancement. OCCSTD tasks are referred to as "CORE" tasks in the chapters published in this manual. NON-CORE tasks are also included in some updated Occupational Rating Standards in order to better define the work being performed by the fleet which is not required of all rating personnel (e.g., NEC, collateral duties, watches, etc.).

a. OCCSTD skills required of rates and ratings are stated in the form of task statements to assist enlisted personnel, commanding officers, manpower managers, and personnel managers in identifying the basic occupational content of rates and ratings. Some OCCSTDs require successful completion of specific skills tests.

b. OCCSTDs state what enlisted personnel must do in their rate or rating. The knowledge required to perform a task is inherent to the proper performance of the task. Development of specific knowledge to support OCCSTDs falls under the purview of Navy training commands.

c. OCCSTDs are minimum essential tasks and general responsibility levels required of a majority of personnel in a rate. Although they may not be performed by the majority of personnel in a rate at any given time, they are still applied to all members of a rate. The more routine tasks are at the lower paygrades. The more difficult tasks and tasks requiring additional experience or involving leadership and supervision are at progressively higher paygrades.

d. OCCSTDs do not limit the utilization of personnel or ratings as to performance of duty. Personnel of any rate or rating may be required by higher authority to perform any task or duty, depending on local circumstance.

e. OCCSTDs generally exclude the broad area of security. All Navy personnel are responsible for the security regulations in DoD Publication 5200.1-R, OPNAVINST 5510 series, and items on security which are described by the NAVSTDs in this manual. Specific security related OCCSTDs are included in those ratings requiring special emphasis on security.

f. OCCSTDs contain no specific reference to safety or Operational Risk Management (ORM) in the performance of required tasks. Observing safety precautions and practicing risk management is inherent to the satisfactory performance of a task.

g. The following OCCSTDs format is used in this manual:

(1) Title, abbreviation, and specialty mark identified with the rating.

(2) Rating Scope is a brief statement of the occupational content of general and service ratings. The scope is all encompassing and includes responsibilities normal to the rating.

(3) Career Pattern is a diagram of the normal advancement path from apprentice to master chief petty officer.

(4) Directives information on Chief Warrant Officer and Limited Duty Officer categories.

(5) Rating entry requirements (MILPERSMAN 1306-618) describe the special physical, citizenship, security, and other requirements for the rating, if applicable.

(6) Safety Statement is a universal self-explanatory statement for all ratings.

h. OCCSTDs, together with NAVSTDs, are patterned to present the total career progression from paygrades E-4 through E-9 for general ratings and service ratings. For example:

(1) The general rating of Boatswain's Mate (BM) has no service ratings. The BM OCCSTDs commence at paygrade E-4 and progress through paygrade E-9.

(2) The general rating of Aviation Boatswain's Mate (AB) and its three service ratings, ABE, ABF, and ABH have individual OCCSTDs at paygrades E-4 through E-8 and common AB OCCSTDs at paygrade E-9.

3. Job specific tasks (NON-CORE) express additional requirements for enlisted occupational skills expected from a sailor performing in a specific job or billet. They, along with NEC specific tasks, form the basis for implementing and supporting actions for enlisted manning, distribution, training, and advancement.

# NAVAL STANDARDS

## E1 through E9

Naval Standards (NAVSTDs) are skills and knowledges, other than those defined by Occupational Standards (OCCSTDs), which are essential to the overall effectiveness of enlisted personnel in the performance of duty; NAVSTDs encompass military requirements; essential virtues of pride of service in support of oath of enlistment; maintenance of good order and discipline; and basic skills and knowledges, pertaining to the well-being of Navy personnel, which directly contribute to the mission of the Navy.

### NAVY ENLISTED BILLET CLASSIFICATION (NEBC) STRUCTURE

#### 1. General

a. The occupational work of Navy enlisted personnel was previously only described by Rate, Rating and Navy Enlisted Classification (NEC) codes. To better support the work and mission requirements of future Navy Total Force (NTF) enlisted personnel, the NEBC was developed to provide a more comprehensive work and job description. General descriptions of the duties performed in a position, along with complete task descriptions, skills and abilities, and experience required to perform Navy work, are essential to the identification and development of flexible and transferable skill sets throughout a NTF.

b. NEBCs identify enlisted position requirements and enlisted occupational experience required to fill a position and is acquired through position experience or through a combination of education, training, and experience.

c. An NEBC provides a general description of duties performed in a position. It is not meant to cover every duty required of the job nor is every duty listed necessarily a requirement of the position. The NEBC identifies a group of enlisted positions which are similar but not necessarily identical in scope and nature of duties.

d. Each NEBC consists of a system-generated six-digit unique identifier (job code), a long title, a NAVMAC assigned 14 and 30 character short title, a job description, proficiency level, and other job specifications required to perform a job. An NEBC may contain tasks, skills, and abilities which would be documented in the enlisted Occupational Standards. NEBCs are maintained in the Master Job Code Table and can be found at

<https://www.mynavyhr.navy.mil/About-MyNavy-HR/Commands/NAVMAC/Workforce-Classification/References/>

e. A need exists in certain Human Resource (HR) operations for occupational information related to NEBCs. The attributes below are assigned to each NEBC to support HR operations.

(1) The Standard Occupation Classification (SOC) code identifies the group number and title in the nation's Occupation Network (O\*NET) which corresponds to the NEBC. The O\*NET SOC is maintained by the Department of Labor (DOL). The SOC provides a common occupational grouping and numerical coding system for classifying the nation's work in the U.S. and can be found at <https://www.onetonline.org/>.

(2) The DoD Occupation Classification (DOC) code identifies the group number and title in the Department of Defense Occupational Conversion Manual (DOD 1312.1 series) which corresponds to the NEBC. The DOC provides a common occupational grouping and numerical coding system for classifying work in DoD and can be found at <http://www.dtic.mil/whs/directives/corres/pdf/131201i.pdf>.

(3) The Navy Occupational Classification (NOC) code represents the occupational classifications of the Navy using a common occupational grouping and numerical coding system. Each job is assigned a NOC code, which will be used to place jobs with similar work within the hierarchy. The NOC code consists of a five level hierarchy. The first level of the code identifies the major group, the second level identifies the minor group, the third in combination with the first two levels identifies job area, the fourth level is the specialty field, and the fifth level indicates a sequential job within the hierarchy. Until further notice, use of this code is temporarily suspended.

2. Application. When applied to a position, the NEBC is a general statement of duties performed in accomplishing some part of an activity's mission. The paygrade distinguishes positions which differ in degree of authority or responsibility but not in essential duties performed.

3. Assignment of a job code on all positions is mandatory.

4. Justification to Establish and/or Retain NEBC(s). To establish and/or retain NEBCs, requests should meet the following criteria:

a. Must describe the qualitative requirements of existing or proposed positions in the Navy (e.g. Activity Manpower Documents (AMD)).

b. Must apply to HR planning, personnel control, career management, education and training, or manpower functions.

c. Must apply Navy-wide and does not reflect purely local conditions or organization unless it is necessary to meet the criteria stated in paragraph 4b.

d. Must not duplicate an existing NEBC.

e. Must identify positions, both regular and temporary (peacetime and mobilization), and employee experience, both active and inactive.

f. Must identify a minimum of **50** positions.

g. Job descriptions should be concise and are limited to 3000 characters, including spaces. Job descriptions should be broad enough to identify all positions with similar requirements yet narrow enough to distinguish significant differences not identified through other codes (e.g., rating, paygrade and activity). Job descriptions stress what is done rather than how or why it is done. They should not include duties required of all employees, such as training of subordinates or preparing routine reports, unless such duties are a distinct requirement of the job.

**NOTE:** A Classification Element (CE) is the basic component into which a classification category is divided, such as: Rating, Navy Enlisted Classification (NEC) code, Navy Officer Billet Classification (NOBC) code, Additional Qualification Designator (AQD) code, etc. NEBCs are a new CE for the Navy Enlisted Occupational Classification System (NEOCS) and will function similar to NOBCs in the Navy Officer Occupational Classification System (NOOCS). They represent Navy jobs.

5. Recommendations to Establish, Delete, or Revise NEBC(s).

a. To ensure NEBCs reflect current technological and administrative developments, commands and employees are invited to review and evaluate these classifications and, if appropriate, submit recommendations for improvement. An activity recommending a new job should first ensure that an established job in its present form, or with some revision, would not suffice for identifying the occupational aspects of the positions involved. Commands recommending establishing, deleting, or revising a job should consider the criteria listed in paragraphs 2, 3, and 4. All recommendations should include the appropriate information as follows:

(1) Recommendations to establish NEBC(s) must include:

(a) Recommended long title. NAVMAC assigns the 14 and 30 character short titles;

(b) Recommended description (limited to 3000 characters, including spaces);

(c) Number and location of positions, by activity type, that the proposed NEBC will identify;

(d) Recommended paygrades applicable to the NEBC tasks;

(e) Information on how the requirements/qualifications are currently identified;

(f) Justification stating why the existing NEBC descriptors are insufficient without the proposed NEBC, and other historical or amplifying information necessary for prudent consideration at each level of review; and

(g) Point of Contact (include commercial and DSN telephone numbers, fax number, and e-mail address).

(2) Recommendations to disestablish NEBC(s) must include:

(a) Long Title and Job Code of existing NEBC(s);

(b) Reason(s) for deleting the NEBC (e.g., qualifications duplicated by another NEBC, insufficient positions to meet the criterion in paragraph 4. (f) and any other information needed for consideration at each level of review;

(c) Information on which NEBCs (include job codes), if any, will absorb the duties of the NEBC and redistribution of NEBC characteristics to identified NEBC(s) that will absorb the duties;

(d) Information on how to recode the positions and job incumbents, if appropriate, presently coded with this NEBC; and

(e) Point of contact (include commercial and DSN telephone numbers, fax number, and e-mail address).

(f) Use standard naval letter format or e-mail when submitting requests for NEBC deletions.

(3) Recommendations to revise NEBC(s) must include:

(a) Long Title and Job Code of existing NEBC(s);

(b) Proposed recoding (if applies), re-titling and/or rewording of the current NEBC and associated characteristics;

(c) Justification for the proposed revision(s); and

(d) Point of Contact (include commercial and DSN telephone numbers, fax number, and e-mail address).

(e) Use standard naval letter format or e-mail when submitting requests for NEBC revisions.

b. The NEOCS Board, per OPNAVINST 1223.1 series, serves as the central point for changes to the Navy Enlisted Occupational Classification System. Activities proposing establishment, disestablishment, or revision to NEBCs should send recommendations, using the following template, via the appropriate chain of command to:

## APPENDIX F

### CRITERIA AND GUIDELINES FOR RECOMMENDING CHANGES TO STANDARDS

#### A. GENERAL

1. The Navy requires a periodic review and update of enlisted Occupational Standards (OCCSTDs). Although the Navy Manpower Analysis Center (NAVMAC) conducts this review and update, all commands are urged to submit recommended changes to the OCCSTDs whenever they identify new, revised, or obsolete requirements.

2. The procedure for developing updated OCCSTDs includes a preliminary review of current OCCSTDs by rating advisors. This validates and identifies new or changing requirements. U.S. Fleet Forces Command (USFF), Type Commanders, Commander, Naval Education and Training Command (NETC), rating advisors, enlisted community managers, and other interested activities then receive these proposals for review and comment. OCCSTDs are endorsed by the Primary Advisor(s) of each rating prior to approval and promulgated by the Director, Military Personnel Plans and Policy Division (N13).

3. Customers should submit potential gaps in OCCSTDs identified during initiatives such as Sailor 2025 and Advancement Exam Readiness Review (AERR) events. This feedback can be submitted via formal letter or email adhering to the task criteria outlined below. This feedback will be evaluated in an expedited manner and, when appropriate, get incorporated into OCCSTDs with Rating Sponsor concurrence

4. Forward recommended changes to OCCSTDs, via the chain of command, to:

Commanding Officer  
Navy Manpower Analysis Center  
5722 Integrity Drive  
Millington, TN 38054-5011

OR

E-mail to: [NAVMACCODE10@us.navy.mil](mailto:NAVMACCODE10@us.navy.mil)

#### B. CRITERIA

1. OCCSTDs should:
  - a. Be consistent with the approved scope of the rating.
  - b. Be stated as an action (i.e., a task to be done). The details of tasks are derived from task analyses and other data.
  - c. Be concise and understandable.
  - d. Reflect the paygrade level at which the task should normally be performed. Changing factors, such as existing or projected low manning levels, should not influence paygrade determination.
  - e. Include only those tasks which are attainable by the average incumbent of a rate.
  - f. Reflect skill progression among the various paygrades as appropriate for the rating.

2. OCCSTDs should not include:
  - a. Knowledge requirements, which are implied in the performance of a task.
  - b. Qualifiers, such as perform an action "in accordance with..." It is assumed that personnel comply with applicable directives and publications when performing a task.
  - c. Enabling tasks, such as perform a task "in order to..." The purpose of the task should be evident.
  - d. Subordinate tasks (i.e., tasks which are elements or sub-tasks of a task which is broadly stated).
  - e. Specific identification of equipment (e.g., AN, MOD or MK). Such detail is not necessary and is subject to rapid obsolescence.
  - f. Equipment or tool lists, such as listing of test equipment to be used. The equipment or tools to be used are inherent to the tasks to be performed. Such lists are questionable as to inclusiveness and accuracy.
  - g. Skills that are represented by the naval standards.
  - h. Security requirements applicable to all Navy personnel as specified in DoD Publication 5200.1-R, OPNAVINST 5510 series. Specific security requirements may be selectively included in those ratings where special emphasis and qualification are required.
  - i. Safety requirements inherent to the performance of a task. Observing safety precautions should be continually emphasized on the job and in training programs. Safety requirements may be broadly stated at the supervisory level where special emphasis is required or at the managerial level for developing safety programs.

### **C. GUIDELINES AND FORMAT**

1. Proposed changes (additions, revisions, or deletions) of existing rating standards shall be requested using the '*Recommend Changes to OCCSTDs Feedback*' sheet which can be obtained from NAVMAC using the following address: E-mail: [NAVMACCODE10@us.navy.mil](mailto:NAVMACCODE10@us.navy.mil).
2. If the proposed change is a revision to existing OCCSTD task, use the following format:
  - a. Identify the OCCSTD task.
  - b. State the revision and the applicable change.
  - c. Give justification for the proposed change.
3. If the proposed change is a new OCCSTD task, use the following format:
  - a. State the proposed OCCSTD task and related data variables (e.g., paygrade, task type (core/non-core), jobs(s) assignment, and functional area).
  - b. Give justification for the proposed OCCSTD task.

4. If the proposed change is a deletion of an existing OCCSTD task, use the following format:
  - a. Identify the OCCSTD task.
  - b. Identify applicable job(s) i.e. if only removing from specific jobs.
  - c. Give justification for deleting the OCCSTD task.
