

CHAPTER III

NAVY RATINGS AND RATING CONVERSION NEC CODES

Paragraph A of this section identifies the current Navy ratings. Paragraph B identifies Entry Series NEC codes used by detailers and classifiers which consist of Rating Conversion NEC codes.

A. NAVY RATINGS

1. **General Ratings (SECNAV Approved):** Identify personnel from paygrades E-4 through E-9. They provide the primary means of identifying billet requirements and personnel qualifications. Each rating has a distinctive rating badge.
2. **Service Ratings (CNO Approved):** These are subdivisions of certain general ratings. Service Ratings identify required specialization and specific areas of qualifications in the utilization and training of personnel. The rating badge for a Service Rating is the same as that for the General Rating.
3. **Reserve Component (RC):** Denotes whether there is a requirement/or not for an approved rating to maintain an inactive duty Selected Reserve (SELRES) component in support of the ratings Active Duty component.
4. **Compression Ratings:** Identify the combining of several General or Service Ratings at paygrade E-9, with the exception of BU, EA and SW, which compresses to CU at paygrade E-8, to form broader career fields when the occupational content is similar.
5. **General Rate:** Identify personnel occupationally in paygrades E-1 through E-3.
