Subj: PROMULGATION OF VOLUMES I AND II OF THE MANUAL OF NAVY ENLISTED MANPOWER AND PERSONNEL CLASSIFICATIONS AND OCCUPATIONAL STANDARDS (NAVPERS 18068F) FOR JULY 2026

Ref: (a) OPNAVINST 1223.1 (series)
(b) NAVPERS 18068F

1. In line with reference (a), Volume I of reference (b) is the official manual of Navy Occupational Standards and Volume II of reference (b) is the official manual of Navy Enlisted Classifications. This edition includes the latest information available at the time of revision.

2. The manual's objective is to define the work performed by enlisted personnel and provide correct and timely identification of skilled personnel and requirements dependent upon the interactive support of all command echelons. Commands are encouraged to forward recommendations for establishments, revisions or disestablishments in line with reference (b) (Appendix-A).

3. Changes to these volumes are updated quarterly. All changes should be coordinated through Navy Manpower Analysis Center.

SUMMARY OF CHANGES

The NEC manual is published quarterly (JAN, APR, JUL and OCT) to provide updated NEC information in a timely manner. Changes (establishments, revisions, disestablishments) to NEC codes identified by the code numbers listed below were made in this revision. Revised NEC codes are those for which a significant change was made (title change, description, course information, sequence code, source rating, component NEC and note). Specific revisions to all chapters of the manual are identified with yellow highlighted print.

CHAPTER I

INTRODUCTION TO THE NAVY ENLISTED CLASSIFICATION SYSTEM

A. PURPOSE

1. The Navy Enlisted Classification (NEC) system, of which the NEC coding system is a part, supplements the enlisted rating structure in identifying personnel on active or inactive duty and billets in manpower authorizations. NEC codes identify a non-rating wide skill, knowledge, aptitude, or qualification that must be documented to identify both people and billets for management purposes. Additionally, an NEC code can be used to identify special circumstances or situations with approval via the NEOCS process.

2. The NEC coding system facilitates management control over enlisted skills by identifying billets and personnel and enhancing efficient use of personnel in distribution and detailing. In cases where NEC codes reflect special training, inventories of coded billets and coded personnel are also the basis for planning and controlling input of personnel into formal courses that earn NEC codes. Consequently, the continuing enlisted strength of the Navy, particularly petty officer allocations, and funds authorized for rating and specialty training depends, to an increasing extent, upon the accuracy, thoroughness, and timeliness of NEC coding. Personnel required to support ratings and special programs must be identified by the correct combinations of rates and/or NEC codes.

B. TYPES OF NEC CODES

1. ***Entry Career Field (SNPACT-WXXX) NEC codes*** consist of Rating Conversion NEC codes.

a. *Rating Conversion NEC codes* identify aptitudes and qualifications not discernible from rates alone and are assigned to identify petty officers or identified strikers who are in training for change of rating or status under approved programs.

2. ***Rating Career Field NEC codes*** are established for a specific rating to codify A, C, and F school completion or multiple ratings to codify C and F school completion; and are used for billet assignment and personnel awarding. Rating Career Field NEC codes identify special or unique billet requirements beyond the skill and knowledge that the general rating would provide. When assigned to an individual, Rating Career Field NEC codes show that the person has obtained certain skills or knowledge and is qualified for detailing to a billet requirement. The NEC code construct for specific A, C, and F school Rating Career Field NEC codes and requisite information can be found in Chapter IV of this manual.

3. ***Special Career Field NEC codes*** have the same purpose as Rating Career Field NEC codes but in general, relate to an unlimited number of ratings.

4. ***Tracking NEC codes*** are approved for tracking unique training/skill sets and/or experience of a Sailor that is not classified as a manpower requirement; they are normally associated with personnel only and not billets. They are used by personnel managers to track “unique” training, i.e. GSA/OSA NEC' codes; personnel absorbed into another rating, i.e. 00LI, 00PC, and 0CTA for verification that they are not being disadvantaged; and unique qualifications such as, i.e. Nuclear Propulsion Plant Operator Trainee (9901).

For distribution purposes only, there are some NEC codes not listed in Chapter IV that have billets, but are not awardable to personnel, i.e. Female Petty Officer (9999). Additionally, there are other distribution NEC codes that are used to create unique requisitions that are also not awardable, i.e. Seaman GENDET Male Only (0051). Most tracking NEC codes are for a particular assignment and will disappear upon transfer; whereas others will stay in inventory until the managers no longer require them or personnel have exceeded the pay grade range.

5. ***Planning NEC codes*** are approved for planning purposes only and are listed in Chapter V of this manual. These NEC codes may be used in conjunction with Navy Training Plans, in developing planned training courses, and other applicable long-range projects. Planning NEC codes are established for assignment on manpower authorizations in the Navy Manpower Requirements System (NMRS) to project requirements in Preliminary Ship Manpower Documents (PSMDs) and Preliminary Squadron Manpower Documents (PSQMDs); and other planning purposes. However, they are not assigned to personnel or billets in the Total Force Manpower Management System (TFMMS).

Submit requests for Planning NEC codes to Director, Navy Manpower Analysis Center (Code 10) via the chain of command. A request must include a proposed title, a ready-for-training date (actual or estimated), billet paygrades, and point of contact. Submit requests to convert approved Planning NEC codes to Rating Career Field or Special Career Field NEC codes 180 days before the date the NEC code is to be awarded (i.e., 180 days before completion of initial course or factory training). Appendix A identifies requirements for establishing new NEC codes.

C. NEC CODE RELATIONSHIPS

1. ***Principal NEC codes*** identify stand-alone skills and may include skills or abilities identified by Component and/or Related NECs. To earn a Principal NEC code that includes a Component NEC, an individual must either already be assigned the Component NEC(s) or be fully qualified for such assignment. When an individual earns a Principal NEC code, in *MOST* cases the individual will not be coded with the Component NEC listed with the Principal NEC code. Component NECs are ***NORMALLY*** removed from the Enlisted Master Record (EMR) when a Principal NEC code is awarded.

2. ***Component NECs*** are prerequisite qualifications for assignment of the Principal NEC code. Chapter IV lists Component NECs with the Principal NEC code with which they are associated. Prerequisite skill(s) (Component NEC) that a member must have earned before being awarded the principal NEC code, if any. Under normal circumstances the Component NEC is removed once the principal NEC code is awarded. However, with sufficient justification for unique situations such as community management initiatives or legacy retainment purposes, the Component NEC may be retained in the members EMR; the stipulation for retainment will be annotated in the NOTE section of the principal NEC code.

3. ***Related NECs*** identify qualifications generally similar to those of the Principal NEC code but are not prerequisites for earning the Principal NEC code. Chapter IV lists Related NECs with the Principal NEC code with which they are associated and are shown for information purposes only.

4. ***NEC Sequencing***:

a. NAVMAC (Code 10) has verification responsibility regarding the assignment of Sequence codes for proposed NEC codes. NAVMAC ensures adherence with established guidelines and will coordinate any exceptions with the ECM.

b. Change of Sequence codes are handled as an NEC code revision and staffed for concurrence from the NEOCS Board.

c. The primary consideration used to make a recommendation to determine assignment of a Sequence code is NEC code seniority and/or specialized skills. The Sequence codes will range from 1 to 9, with 1 being the highest position (highest priority) and 9 being the lowest position. A Career NEC code will have a higher position than an Initial NEC code.

d. Sequence codes (positions) will be determined using the following guidelines:

Code	Criteria
1	Entry Series, Conversion, Special Warfare, or Nuke NEC codes (i.e., 01DK, 0199, 5333, and 3354).
2	Senior Enlisted experience and Specialized Skills NEC codes.
3	Supervisor/Management; Advanced Technical and Operational/Fleet Critical NEC codes.
4	Operator, Maintainer, Analyst NEC codes (Career).
5	Intermediate Level Technician, Operator/Maintainer NEC codes.
6	First Tour/Initial NEC codes. Basic Operator, Organizational Maintenance.
7	Special Series Technical or Supervisor in nature. NEC codes that may be used again (i.e., Microminiature Repair Inspector, Instructor, Safety).
8	Special Series Non-Technical single-use or Tracking NEC codes (i.e., Correctional Counselor, 0090, 802A).
9	GWOT (Global War on Terrorism) Support Assignment (GSA)/Individual Augmentee and Expeditionary Forces NEC code management.

NOTES:

1. When an NEC code is a component of/or a building block to a more advanced NEC code, the Sequence Code assigned to the Component NEC will normally be assigned a lower priority sequence code than the principal NEC code.

2. In cases where an individual earns two or more NEC codes with the same sequence code number, the NEC code that the individual most recently qualified for will take precedence except in unusual circumstances. NEC code sequence code numbers are shown in Chapter IV.

3. Source Ratings are listed with each Rating Career Field NEC code.

a. Rating Career Field NEC codes will be assigned only to personnel in designated source ratings or the apprenticeship rates and/or striker-identified rates applicable to a designated source rating.

b. Personnel should be nominated or sent to courses of instruction earning NEC codes only if they are in the proper source rating or apprenticeship.

c. Personnel already specialized by a Rating Career Field NEC code normally should not be nominated or sent to a course of instruction earning an additional NEC code unless the course is a logical progression of the earlier specialty training, the NEC code held embodies an outdated technology, or they are in an approved program for formal conversion to a new rating.

4. Paygrade restrictions for assignment of NEC codes to individuals and for application to billets are listed in Chapter IV. Refer to Chapter V for paygrade information for Planning Series NEC codes. Billet paygrades for NEC codes are provided as guidance in changing or recommending changes to Activity Manpower Document (AMD) or other enlisted manpower documents. The billet paygrade range information is based on one or more of the following:

a. Personnel paygrade restrictions (see Chapter IV).

b. Training course prerequisites contained in the Catalog of Navy Training Courses (CANTRAC) (NAVEDTRA 10500).

c. Authoritative judgment obtained from BUPERS Enlisted Community Managers, Primary Rating Advisors, and others possessing specialized knowledge.

d. Data provided in research studies and analyses.

D. NEC CODING USED IN MANPOWER, PERSONNEL AND TRAINING INFORMATION SYSTEM (MAPTIS)

1. An NEC code is assigned to an individual when it is recorded in the Manpower, Personnel and Training Information System (MAPTIS). A page 4 service record entry will reflect these authorized assignments as a 4- character NEC code value. A value of "0000" is used where no Entry, Rating, or Special Career Field NEC code is assigned.

2. ***Entry Career Field (SNPACT-WXXX)*** NEC codes are always Primary NEC (PNEC) codes and are not removed until an individual has advanced to petty officer status, becomes an identified striker, or changes rating status.

3. ***Special Career Field*** NEC codes are always Secondary NEC (SNEC) codes or lower.

4. ***Rating Career Field/Tracking*** NEC codes are PNEC codes, SNEC codes, or lower (depending on the number of NEC codes earned by an individual) but may not replace an Entry Series NEC code unless the individual has advanced to petty officer status, has become an identified striker, or has changed rating status.

E. APPLICABLE COURSES AND ON-THE-JOB TRAINING

Formal courses of instruction, satisfactory completion of which will earn an NEC code, are listed in Chapter IV with the applicable NEC code. If a formal course is mandatory for earning an NEC code, it will be shown in Chapter IV. Chapter IV will also show if a NEC code may be awarded through on-the-job training (OJT) or, if appropriate, through factory training. See NEC code assignment information for personnel (Chapter IV paragraph B.4) for additional information on recommending personnel for NEC codes based on OJT.

CHAPTER II

RESPONSIBILITIES AND PROCEDURES

A. AUTHORITIES AND RESPONSIBILITIES

1. **The Chief of Naval Personnel (CNP)** is responsible for the formulation and implementation of the NEC coding system and for maintaining technical control over the entire NEC system per MILPERSMAN. Authorities and responsibilities delegated by CNP, as per MILPERSMAN 1221-010, are outlined below.

2. **The NEC Code Management Section (BUPERS-328)** is responsible for administering the NEC coding system for enlisted personnel on active duty. In this regard, the Commander, Navy Reserve Forces Command and the Navy Reserve Readiness Commanders will continue to monitor NEC coding efforts by inspections and through the Reserve Pay and Personnel Services. This includes Conversion NEC code assignments and cancellations.

3. **The NEC Code Management Section (BUPERS-312)**, in coordination with CNP, is responsible for effective use of NEC code information in the distribution, placement, and detailing of enlisted personnel.

4. **Commands conducting courses of instruction** that award NEC codes are responsible for reporting on students per OPNAVINST 1510.10(series).

5. **Enlisted Classification Units**, under the technical direction of the NAVPERS are responsible for reviewing NEC codes, and recommending coding assignments or cancellations directly to BUPERS-312.

6. **All commands** are responsible to ensure that only personnel in proper source ratings are afforded training in NEC code specialties, for making recommendations for NEC code identification of billets in their manpower authorizations, and recommending assignment or cancellation of all other NEC codes per this manual.

B. INSTRUCTIONS FOR ASSIGNING AND CANCELING NEC CODES

1. **NEC codes** may be assigned or canceled as follows:

a. By commands conducting formal courses of instruction submitting reports per OPNAVINST 1510.10(series).

b. By Enlisted Classification Units submitting recommendations to PERS-4013D2 for accessions to active duty.

c. By the NEC Management Section (BUPERS-312) for active duty personnel.

(1) Assigning NEC codes to personnel through on-the-job training or where not otherwise reported via the Corporate Enterprise Training Activity Resource System (CeTARS).

(2) Coordinating requests to waiver NEC code award requirements with OPNAV (N132) cognizant Enlisted Community Manager, as appropriate.

d. By the NEC code Management Section (BUPERS-312) for inactive duty personnel based on recommendations received from Navy Reserve Commands and Units via their echelon IV.

e. An individual's NEC code assignments, as authorized above, are those recorded in MAPTIS. When notified of changes by receipt of a completed NAVPERS 1221/6, commands will record these changes on page 4 NAVPERS 1070/604 service record entry using award date indicated on NAVPERS 1221/6. Do not report NEC code assignments to BUPERS-312 by personnel diary.

2. **NEC Codes for Personnel**. Individual commands and drilling units are responsible for recommending assignment or cancellation of all NEC codes other than Entry Series NEC codes as follows:

a. Active Duty:

(1) USN and USNR, including FTS: to Commanding Officer, Enlisted Personnel Management Center (BUPERS-312).

(2) Exceptions to the normal award criteria, including waivers, are to be requested from BUPERS-312 via endorsing commands per current OPNAV and NAVPERS instructions or as noted in Chapter IV of this manual as a specific note to that NEC code. Chief of Naval Operations, Head Enlisted Community Management BUPERS-32 will provide policy guidance to BUPERS-312 concerning NEC code removals and award criteria. Exceptions include:

(a) Nuclear Propulsion Plant Operator (NXXX): OPNAVINST 1220.1 (series) (NOTAL) contains amplifying instructions and additional criteria for removing or changing NEC codes used to designate personnel trained as Nuclear Propulsion Plant Operators (Surface and Submarine). Submit NAVPERS 1221/6 for these personnel directly to OPNAV (N133).

(b) Remove submarine related NEC codes via Head, Nuclear Power/Submarine Assignment Branch (PERS-403). Of special note, submarine disqualifications and reinstatements will be per the MILPERSMAN 1306-418 and 1220-040, with PERS-403 as the final adjudicator.

(c) HM NEC code removals and waivers of mandatory courses of instruction will in all cases be forwarded by BUPERS-312 to OPNAV (N13) for adjudication.

(3) HM personnel holding an NEC code beyond the prescribed paygrade cap will not have their NEC code removed without OPNAV (N132) approval. This is to facilitate the management of critical specialties as the inventory paygrade ceilings transition to match billet paygrade ceilings while ensuring the strength of each community adequately sustains mission requirements.

(4) HM personnel who lose their NEC code for poor performance or disciplinary reasons will have the NEC code removed from the Enlisted Master Record. Commands are required to provide appropriate supporting documentation, (i.e., special evaluation). NEC code removals should not be used in place of administrative separation proceedings or forced conversions.

(5) Certification/recertification of clinical proficiency is the responsibility of the member. Failure to attain and maintain clinical proficiency is ground for NEC code removal, loss of remaining SRB entitlement, and reassignment as an HM "0000".

NOTE: With current policies and instructions in place to establish the validity of an individual's NEC code qualifications, the via endorsement will be the determining factor in the award or removal of the NEC code from the individual's Enlisted Master Record.

b. Inactive Duty:

(1) All Rating Conversion codes: to PERS-4013 via cognizant Naval Reserve Readiness Commander or Chief, Naval Reserve as appropriate.

(2) Intelligence Specialist personnel in paygrades E-7 and below: to Naval Intelligence Command (NIC-13), 4600 Silver Hill Road, Washington, D.C. 20389-5000 via Commanding Officer with the following documentation:

(a) Inactive NAVPERS 1221/6.

(b) Certified copies of last three enlisted evaluations.

(c) All Navy Occupational, Training and Awards History (NAVPERS 1070/604 Rev 11-81).

(3) Restricted NEC codes (Non-traditional training or experience): to BUPERS-312 via cognizant Naval Reserve Readiness Commander/ISIC and Chief of Naval Reserve with the following documentation:

(a) Inactive NAVPERS 1221/6 including justification for assignment of requested NEC code.

(b) Certified copies of substantiating documentation (degree, vocational certificates, professional licenses, etc.).

(c) Current job description if NEC code requested is based on civilian work experience.

(4) NPC (PERS-4013) will take appropriate action upon receipt and if applicable forward the package, including coordination of request to waiver NEC code requirements with OPNAV (N13) cognizant Enlisted Community Managers, to the program Technical Advisor for final determination or certification.

C. GENERAL ASSIGNMENT AND CANCELLATION INFORMATION

1. Personnel are automatically assigned NEC codes upon satisfactory completion of applicable courses through CeTARS as outlined in OPNAVINST 1510.10(series). This ensures faster NEC code assignments and reduces paperwork at the command level. NEC codes earned through JQR, PQS, OJT and/or factory/Cadre training is not automatically assigned, therefore, increased command attention is required to recommend fully qualified personnel for these NEC codes. In those cases where NEC code assignments are not restricted to mandatory completion of applicable courses or factory/Cadre training, recommendations can and should be forwarded for assignment of NEC codes based on JQR, PQS, and/or OJT. The length of JQR, PQS, and/or OJT is normally at the discretion of individual commanding officers, however, six to twelve months, depending on the complexity of the NEC code, should be considered minimum. Specific requirements for NEC codes are listed in Chapter IV as "NOTES" under an NEC code or NEC code group heading. Commanding Officers must ensure that these specific requirements, including any component NEC codes, are successfully completed.

2. Individuals must either hold or be qualified to hold the Component NEC codes. To recommend personnel for an NEC code, use NAVPERS 1221/6 for active and inactive duty personnel. See Appendix A for additional information and instructions for NEC code recommendations.

3. When recommending new NEC code assignments, review qualifications for NEC codes presently held and provide comment, particularly in those instances where a positive requirement exists for maintaining NEC code qualifications in accordance with established criteria, (e.g., Aircrewman qualifications).

4. Close command attention is required for recommending cancellation of NEC codes. This requires command recommendations to cancel NEC code assignments in cases where enlisted personnel do not perform

their NEC code duties satisfactorily, normally within six months after reporting aboard. Failure to recommend NEC code cancellation may result in these unqualified or unsatisfactory performers being reassigned under the NEC code, possibly resulting in manning or readiness problems for a new command or in the failure to assign sufficient qualified personnel to current command.

NOTE: Appendix A provides instructions on how to prepare and submit recommendations for establishing, disestablishing, or revising NEC codes.

D. COMMAND NEC CODE BILLET CHANGE REQUESTS (BCR)

1. Procedures are specifically noted in the Manual of Navy Total Forces Manpower Policies and Procedures (OPNAVINST 1000.16 series). The specific information required and format to be followed for each situation is provided in detail.

2. Of special interest, the Activity Manpower Document (AMD) Short-format Change Request applies to NEC code changes being requested for authorized billets. The request format is found in OPNAVINST 1000.16 and applies to military ships and squadrons only. It is provided for requesting minor changes to reduce the response time. The changes that may be requested by use of the short-format change request are restricted to:

a. NEC code changes for billets incident to authorized equipment changes. Not authorized using short-form change requests are changes for aircrew, instructor or counselor NEC codes.

b. Correction of typographical errors noted in Manpower Authorizations, (i.e., billet titles).

3. Submit AMD BCRs to Navy Manpower Analysis Center (Code 20) via chain of command (i.e., type commander/Budget Submitting Office (BSO)). Clearly substantiate the request and attach required supporting documentation.

CHAPTER III

NAVY RATINGS AND RATING CONVERSION NEC CODES

Paragraph A of this section identifies the current Navy ratings. Paragraph B identifies Entry Series NEC codes used by detailers and classifiers which consist of Rating Conversion NEC codes.

A. NAVY RATINGS

1. General Ratings (SECNAV Approved): Identify personnel from paygrades E-4 through E-9. They provide the primary means of identifying billet requirements and personnel qualifications. Each rating has a distinctive rating badge.

2. Service Ratings (CNO Approved): These are subdivisions of certain general ratings. Service Ratings identify required specialization and specific areas of qualifications in the utilization and training of personnel. The rating badge for a Service Rating is the same as that for the General Rating.

3. Reserve Component (RC): Denotes whether there is a requirement/or not for an approved rating to maintain an inactive duty Selected Reserve (SELRES) component in support of the ratings Active Duty component.

4. Compression Ratings: Identify the combining of several General or Service Ratings at paygrade E-9, with the exception of BU, EA and SW, which compresses to CU at paygrade E-8, to form broader career fields when the occupational content is similar.

5. General Rate: Identify personnel occupationally in paygrades E-1 through E-3.

CHAPTER IV

RATING COMMUNITY AND CAREER FIELD NEC CODES

A. PURPOSE

Rating Career Field NEC codes are established for a specific rating to codify A, C, and F school completion or multiple ratings to codify C and F school completion; and are used for billet assignment and personnel awarding. Rating Career Field NEC codes may be assigned to billet requirements (skill/knowledge requirements) to identify skill and knowledge beyond that which is provided by the General or Service rating. Rating Career Field NEC codes may also be awarded to personnel only, for tracking C and F school completion that the person has obtained for certain skills or knowledge and is qualified for detailing to a billet requirement:

- Special Career Field NEC codes have the same purpose as Rating Career Field NEC codes but in general, relate to a large number of ratings.

- Current NEC codes throughout this chapter are constructed per the approved Occupational Communities, Career Fields, and Associated Ratings.

- Data fields associated with the NEC code description identified in this chapter are defined in paragraph B. The **YELLOW** shaded print denotes an update for the most current entries into this chapter.

B. DEFINITIONS

1. SOURCE RATINGS. Ratings eligible for NEC code awarding to personnel and assignment to billets.

2. BILLET PAYGRADES. This information is presented as guidance in writing billets on Activity Manpower Document (AMD). Low/High paygrades reflect the lowest and highest paygrades that can be written for billets identified by the NEC code. Commands requesting changes to manpower authorization should comply with these paygrade limits.

3. PERSONNEL PAYGRADES. The NEC code may be assigned only to personnel in paygrades indicated.

4. COURSE. Identifies whether completion of a training course(s) is a mandatory requirement for assignment of the NEC code or whether the NEC code may be earned through OJT (On-the-Job-Training), (i.e., based on qualification through on-the-job training). If the length of OJT is not specified, it shall normally be a minimum of six months.

5. COURSE IDENTIFICATION NUMBER (CIN). The Navy Course Identification Number (CIN) is obtained from Corporate Enterprise Training Activity Resource System (CeTARS). An indicator P/L (Pipeline) next to CIN signifies that additional COI is required before NEC code could be awarded. If blank, the NEC is awarded through a combination of one or more Component NECs or on-the-job training, or assignment of NEC has been discontinued.

6. COURSE DATA PROCESSING NUMBERS (CDPs) FROM CeTARS. CDPs are assigned to formal training courses included within CeTARS per NETCINST 1510.1 (series). They are used by the Bureau of Naval Personnel and training activities for reference purposes.

7. SEQUENCE CODE. The number that appears in this column (1 through 9) identifies the position of the NEC code on documents used in personnel distribution. Appendix A, pg 3, Para 1.b. provides guidance in determining assignment of Sequence codes.

8. ESTB DATE (Establishment Date). The date (e. g. 9/10/01) in which the approval letter was signed to establish the NEC code. The NEC code was effective immediately as of this date.

9. REV DATE (Revision Date). The date (e. g. 10/3/11) in which the approval letter was signed to implement the latest revision to the NEC code. The NEC code revision was effective immediately as of this date.

10. NR IND (Reservist Indicator). The following letters are used to categorize the attainability of NEC codes by inactive duty Selected Reserve (SELRES) personnel, and the assignment of NEC codes to SELRES personnel and manpower requirements:

A: The NEC code is attainable by SELRES, and is therefore assignable to SELRES personnel and manpower requirements with no restrictions. SELRES are able to complete training for the NEC code within three years of normal inactive duty training cycles of 48 regular drills and two weeks Annual Training (AT) per year (Training Category (TRC) A). The NEC code can be earned by the following means:

- Active Duty formal training courses that have not been modified or segmented into modules for SELRES applications.

- Segmented or modularized formal training courses that may be completed within three years of normal TRC A training cycles (Note 1).

- Specific civilian training/certification (Note 2).

- On-the-job training (OJT) that can be completed with three years of normal TRC A training cycles (Note 2). Additionally, NEC codes are assignable to SELRES manpower requirements if the formal courses of instruction that award the NEC code will be modified to facilitate

SELRES completion of all requirements for the NEC code within three years of normal TRC A training cycles. The requirements for periodic recertification/requalification for the NEC code cannot exceed a normal, annual TRC A training cycle (Note 1).

R: The NEC code cannot normally be attained by SELRES within three years or normal TRC A training cycles, but is assignable with restrictions to SELRES manpower requirements if SELRES already holding a NEC code in this category can maintain periodic recertification/ requalification required for the NEC code within a normal, annual TRC A training cycle.

N: The NEC code is not assignable to SELRES personnel or manpower requirements because periodic recertification/requalification for the NEC code cannot be maintained by a SELRES during a normal, annual TRC A training cycle. Programming of SELRES manpower requirements with these NEC codes is not authorized (Note 4).

NOTES:
1. A formal training course that awards the NEC code or maintains recertification/requalification may be segmented into modules if recommended by COMNAVRESFOR (Code 04), approved by OPNAV (N7/CNET) and certified to be funded for segmentation by the appropriate OPNAV resource sponsor. If the training agent certifies that the training course will be on line within one year, assignment of the NR IND of A is allowed.

2. NEC codes will be awarded to SELRES personnel upon completion of civilian training courses leading to the awarding of a certificate, diploma or license, and for the completion of OJT when a waiver of formal training requirements has been requested and obtained from the appropriate training agent.

3. COMNAVRESFOR will annually review and coordinate the update of all SELRES NEC code categories with appropriate NEC code Advisors.

11. COMPONENT NEC. Prerequisite requirement for awarding the principal NEC code to personnel. Under normal circumstances, if the NEC code (s) identify “C” or “F” school completion, the NEC code (s) is/are removed once the principal NEC code is awarded. However, with sufficient justification for unique situations such as community management initiatives or legacy retainment purposes, the Component NEC may be retained in the member’s personnel record; the stipulation for retainment will be annotated in the NOTE section of the principal NEC code. If the NEC code identifies “A” school Ready Relevant Learning/Block Learning (RRL/BL) completion, the NEC code will be removed once the principal NEC code is awarded with NO exception.

12. RELATED NEC. NEC code that is not a prerequisite to the principal NEC code, but is similar or identical with part or parts of a principal NEC code.

13. LEGACY NEC CODE. Identifies the NEOCS approved Legacy NEC code established prior to the 1 October 2017 implementation start date for the current RRL/BL NEC code construct attached to the title.

14. PRIMARY ADVISOR. The command or office with primary responsibility for the functional or mission area that a NEC code is principally used. The Primary Advisor is concerned with all aspects of associated NEC codes.

15. TECHNICAL ADVISOR. The command or office having cognizance over the technical areas in which a NEC code is principally used. The Technical Advisor is concerned with manpower or weapon system relationships and training requirements related to technical aspects of the NEC code.

16. ECM/PERS. BUPERS code responsible for managing the "health and welfare" and career development plans of the enlisted ratings, rates and NECs within his/her purview.

17. NOTE (S). Contains additional information that is pertinent for the assignment of the NEC code to both billets and personnel. Identifies special qualifications associated with the NEC code (i.e. a security clearance, 20/20 vision, certifications); specific criteria for recertification and any related timelines shall also be addressed; any other special stipulations required for awarding and/or assignment. This section is also utilized to provide guidance for retaining the NEC code on billets for a period of time or occurrence such as the phasing-out/sun-downing of legacy equipment. For accurate NEC code management, it is very important that the Primary and Technical Advisors conduct, ***at a minimum***, an annual review of ***ALL*** NEC codes under their purview for validity. The Catalog of Navy Training Courses (CANTRAC) is the authoritative source for specific training, certification/recertification, and other requisite requirements such as physical stature attributes that ***MUST*** be maintained by an individual.

C. NEC CODE CONSTRUCT

The first character is alphanumeric indicating the specific Enlisted Career Field (AXXX-WXXX); or that the NEC code is open to multiple Enlisted Career Fields (7XXX/8XXX). All language NEC codes begin with 9 and the DoD mandated three-character language trigraph is added, e.g. 9KUR (Kurdish).

- NEC codes with associated training that is not blocked ends with a letter (XXXA-XXXZ); prerequisite C/F schools, OJT/JQR/PQS, and Factor/Cadre training.

- NEC codes with associated training that is blocked ends with a number (XXX2, XXX1, XXX0); prerequisite A school training that identifies the number of blocks remaining, e.g. Block 0, Block 1, and Block 2 which means there are 3 NEC codes established (0 = fully trained).

GXXX - AVIATION (AIR CREW) COMMUNITY & CAREER FIELD

AVIATION WARFARE SYSTEMS OPERATOR
APPLIES TO NAVAL AIRCREWMEN OPERATOR NEC CODES: AWs are Naval Aircrewman (NAC) in a permanent flight status. They man positions in fixed and rotary wing aircraft based ashore and aboard aircraft carriers, escort vessels, sea control ships and serve in ASW Modules and Tactical Support Center (TSC). They also perform collateral duties in rescue and utility functions aboard multipurpose aircraft. AWs who no longer volunteer or are not qualified for flight, must convert their rating in accordance with MILPERSMAN 1220-020.

NOTES:
1. AW personnel perform in-flight duties in accordance with various aircrew positions as enumerated by the Chief of Naval Operations.
2. These NECs reflect a member's aircrew and rating standards and verify the member's entitlement to flight pay. They do not, however, authorize payment nor determine the category of payment.
3. Participation in the NAC program and the principles governing payment therefore are contained in BUPERSINST V40A.4. Compliance with this instruction is mandatory prior to submission of recommendations for these NECs.
4. Individuals should be recommended for assignment of these NECs as soon as respective qualifications are obtained.
5. Final qualification for NAC designator is not a prerequisite for assignment of these NECs. However, final aircrew qualification is a requirement for retention within the AW rating community.
6. Basic specialty NEC codes will be assigned upon satisfactory completion of fleet readiness squadron training. Regardless of the NEC code, NAC designation may only be awarded after successful completion of operational standards prescribed by the Chief of Naval Operations.
7. These NECs are the primary means of identification for AW aircrew qualifications. Commands shall ensure submission of NAVPERS 1221/6 to BUPERS-312 immediately upon qualification for these NECs. Request for removal of any of these NECs will be submitted to OPNAV N13 via BUPERS-312 for final adjudication. Special emphasis must be given to the accuracy of billet coding and individual identification to provide for the assignment and/or retention of aircrew within the enlisted personnel distribution system.

H11C – Master Digital Network Exploitation Analyst

Leads Basic and Senior Digital Network Exploitation Analysts and provides operational guidance to senior leaders based upon analysis on collected information for metadata and content. Utilize specialized tools and data to reconstruct and recommends target networks vectors, identifies key relevant cyber terrain, and determines collection priorities to advise team leadership on follow-on Cyberspace Operations. Leads and performs target analysis of communication technologies and digital network systems vulnerabilities for target prioritization. Recommends actions to senior leadership on the coordinated pursuit of cyber advisories as authorized to follow-on Cyberspace Operations.

JXXX - INFORMATION WARFARE (METEOROLOGY/OCEANOGRAPHY) COMMUNITY & CAREER FIELD

J00A - Meteorological and Oceanographic (METOC) Forecaster
Conducts a broad range of METOC forecasting activities to be performed in a wide variety of contexts in the generation of METOC products and operational recommendations. Assesses the impact of the elements of the physical environment (Land/Sea/Air/Space) and land/sea interface on both friendly and enemy platforms, sensors and weapon system performance, safety of flight and navigation, and naval/joint operations and missions. Evaluates numerical model performance to quantify the accuracy and reliability of future performance. Analyzes hydrographic features and elements on nautical/navigation charts and forecasts METOC conditions on Synoptic, Meso, and Micro scales. Analyzes side-scan, multi-beam, and single-beam sonar imageries. Collects and analyzes ocean bottom data using unmanned underwater vehicles. Creates climatological studies supporting Naval Warfare Planning. Produces forecasts and warnings. Characterizes the operating environment and recommends courses of action to enhance the warfighters' ability to exploit the physical environment for successful mission accomplishment. Briefs forecasted METOC conditions in support of Warfare Operations (e.g. Anti-Submarine Warfare (ASW), Mine Warfare (MIW), Strike Warfare (STW), Navy Special Warfare (NSW)). Distributes data internally and externally to aircraft, ships, and shore activities via communication devices/web-centric architecture.

M1DV - Diver First Class

Qualified to dive and supervise using Air and Mixed Gas USN Diving Apparatus. Supervises the operation, tests, repairs and adjusts all USN Diving Equipment, systems and support equipment. Supervises recompression chambers operation, diagnoses and treats diving related injuries. Supervises underwater inspections, harbor/port/ship security inspections, including ordnance searching, Ship/submarine repair, salvage, expeditionary salvage and littoral combat, rescue, special warfare operations, underwater cutting and welding, demolition operations and small boat operations. Operates and Supervises Swimmer Delivery Vehicle Dry-Deck Shelter systems, submarine Lock-in/Lock-out systems and submarine rescue chambers. Trains USN, DOD military and other personnel in diving Procedures equipment and systems. Trained in advanced diving physics, medicine and saturation diving techniques. Dives and performs underwater demolition for the purpose of open ocean salvage, ship husbandry, or underwater construction operations. Employs the principle and techniques of precision demolition in projects requiring cutting, flattening and/or removing of pilings, obsolete moorings, or other obstructions in channels, harbors, open oceans, or other areas of concern. Operates, maintains, and supports saturation/deep dive systems and equipment.

N13S - N16S - Submarine Nuclear Propulsion Plant Supervisors
Fully qualified by virtue of seniority, experience and demonstrated proficiency (including specified watchstation qualification) to supervise the operation and maintenance of a submarine nuclear propulsion plant.

NOTES:
1. Assigned upon recommendation by the Commanding Officer to Petty Officers Second Class and above who have completed four or more years active naval service and are currently qualified the specified watchstations. For paygrade E-5, the Commanding Officer should ensure all military and professional requirements for advancement to E-6 are completed before forwarding recommendation (Include watchstation qualification dates and completion of advancement requirements on NAVPERS 1221/6).
2. Members serving in senior nuclear billets (NEC code N1XS) at commands where the specified watchstations do not exist are considered to have satisfied the watch qualification criteria if they were previously qualified on the required watchstations. Personnel who are advanced to CPO while serving at these commands may continue to be eligible for NEC code N1XS based on previous attainment of watchstation qualification required for paygrade E-6. In all cases, previous watchstation qualification must be documented in the member's service record.
3. Members with NEC code N1XS who are transferred to a nuclear powered ship and assigned in a senior nuclear billet will retain NEC code N1XS for a maximum of six months. If the member has requalified on the applicable watchstations, NEC code N1XS may be retained. If the member has not requalified in six months, the Commanding Officer is directed to recommend a change in NEC codes N1XS to N1XO or removal of NEC code as appropriate (See OPNAVINST 1220.1 Series for guidance).
4. First Class Petty Officers with NEC N1XS attached to nuclear powered ships who are advanced to CPO will retain their NEC code while completing qualification as Engineering Watch Supervisor. OPNAVINST 1220.1 Series (NOTAL) specifies time limits for attainment of required watch station qualification.
5. Members with NEC code N59X who are scheduled to be transferred to a nuclear powered ship are screened by Bureau of Naval Personnel (N13) per MILPERSCOMINST 1540.1 Series. Based upon this screening, NEC codes N1XO or NEC N1XS will be assigned. Bureau of Naval Personnel (N13) will specify requalification time limits for the individual by letter to his/her Commanding Officer. MILPERSCOMINST 1540.1 Series and OPNAVINST 1220.1 Series (NOTAL) apply. Commanding Officers should recommend NEC code change to N1XO as a step toward possible NEC code removal recommendation when personnel with N1XS are delinquent in requalification (See OPNAVINST 1220.1 Series of guidance).
6. Commanding Officers shall recommend NEC code N1XO in the case of those members with NEC code N1XS who are unable to maintain the necessary proficiency and leadership skills for continued assignment in senior nuclear power supervisor positions but who are still considered satisfactory nuclear propulsion plant operators. Those personnel who are unable to regain the necessary proficiency and leadership skills for supervisory positions should be considered for removal of their nuclear operator NEC code N1XO (See OPNAVINST 1220.1 Series of guidance).
7. Submit recommendations for change or removal of NEC code (s) for Enlisted Nuclear Propulsion Operators to the BUPERS (N13) who will resolve the NEC code change recommendation (See OPNAVINST 1220.1 Series for additional guidance).

U48A - U51A - Non-Destructive Testing (NDT) Metal Specialists

When an HT who is not currently certified in specific NDT technique is assigned to a NDT billet, certification must be established in accordance with NAVSEA 05 250-1500-1 and NSTM CH 074 V2 within three months of reporting on board. If the inspector/examiner fails to recertify, a NAVPERS 1221/6 recommending removal of the specific NEC code shall be submitted by the Commanding Officer. The NEC code removal must cite the reason for the individual's failure to certify/recertify and whether the member has performed to the extent of his/her ability. If an extension of recertification time beyond three months is considered appropriate, the member's Commanding Officer shall submit a request for a maximum 3-month extension to CHNAVPERS (Pers-402). This request must discuss the reason for the extension. Subsequent to initial certification or recertification the inspector/examiner must maintain certification when assigned to an NDT billet regardless of the duties to which assigned. NEC codes U48A-U51A require certification. Submit NAVPERS 1221/6 to BUPERS-312 with a verification copy attached. Addressed requests for examiner certification to:

1. The AWF "Source Rating" is limited to the FTS community members who have previously earned the NEC code prior to 1 October 2008 ONLY. This NEC code is not authorized for NEW assignment to AWF members who did not previously earn the NEC code prior to 1 October 2008.
2. Due to the unique nature of the AWF FTS community, personnel who earned NEC codes 724B or 770B prior to the fixed wing AW rating merger may reapply for reinstatement of their previously awarded 724B or 770B. Member must provide documentation and NAVPERS 1221/6 to BUPERS-312 via BUPERS-312 (Aviation ECM) showing NEC code was previously awarded or member completed all prerequisites prior to 1 October 2008. All AWF FTS personnel who previously held 770B and request reinstatement, will also be eligible to request 724B, provided all requirements are met. Awarding of this NEC code for Source Rating AW (E9) only applies to SELRES personnel.
3. For all other listed "Source Ratings" to be awarded this NEC code, personnel must be a Senior Chief or Master Chief who has held one or more of the following billets while at the E8 or E9 paygrade; and must have served in the billet for at least 12 consecutive months: Maintenance Control Supervisor, Production Control Supervisor, Quality Assurance Supervisor (O or I Level), Special Reconnaissance Team (SRT) LCPO. NEC code shall only be awarded to E8 and E9 personnel who are currently filling the role in one of the requisite billets at the O-Level, I-Level, or SRT. Requests to award the NEC code shall be made by the command where the member fulfilled the billet requirement. “FROCKED” E8 personnel are not eligible to hold the NEC code. Submit documentation of completed prerequisite billet along with NAVPERS 1221/6 to BUPERS-312 via the ECM.
4. Commanding Officers, Executive Officers, Maintenance Officers (at I-Level), or Officers in Charge are the approving authority to sign the NAVPERS 1221-6 requesting the 724B NEC code. Signature authority shall not be delegated.
5. Requests submitted from non-maintenance commands will not normally be considered. In the event that operational or other commitments preclude submission by the command where the qualifying duty was performed, the requesting personnel shall submit an endorsement from that command along with the official request from the current command.
6. Source rated personnel at the O-Level shall be Safe-For-Flight (SFF) qualified in the current type/model/series aircraft prior to awarding the NEC code. VX squadron personnel must be qualified in at least one platform of aircraft type/model/series.
7. Source rated personnel at the I-level shall complete the required Production Control PQS/JQR.
8. Source rated personnel (not including AW) assigned to SRT operating UAV’s may qualify for the NEC code after completion of Maintenance Course, Operator Course, type/model Safe-For-Flight PQS, and at least one deployment cycle.

822A - Joint Terminal Attack Controller (JTAC)

A qualified (certified) service member who, from a forward position, directs the action of combat aircraft engaged in Close Air Support (CAS) and other offensive air operations. A qualified and current JTAC will be recognized across DoD as capable and authorized to perform terminal attack control. CAS is an element of joint fire support. Synchronizing CAS in time, space, and purpose with supported maneuver forces increases the effectiveness of the joint force. CAS is air action by fixed and rotary-wing aircraft against hostile targets that are in close proximity to friendly forces and that require detailed integration of each air mission with fire and movement of those forces. CAS assist land, maritime, amphibious, and Special Operations Forces (SOF) to move, maneuver, and control territory, populations, and key waters. The support commander establishes the priority, timing, and effects of CAS fires within the boundaries of the land, maritime, SOF, or amphibious force's area of operations. SOF may also need CAS and other joint fire, support at locations well beyond land, maritime, and amphibious operations force commanders' areas of operations.

NOTES:
1. Courses, CINs and CDPs:

a. Courses without CIN or CDP listed are not currently available. Courses can be developed if a requirement exists. Contact OPNAV (N13F) for further guidance.

b. If a CIN/CDP listed above does not appear in CANTRAC, please contact LREC@us.navy.mil for information.

2. NEC Code Awarding Criteria:

a. May be awarded for foreign language proficiency as measured by an approved Department of Defense (DoD) language proficiency test at the 1+ level in reading and the 1+ level for listening on the Interagency Language Roundtable (ILR) scale. May also be awarded for speaking proficiency at the 1+ level as measured by a DoD approved Oral Proficiency Interview (OPI) if no DoD proficiency test is available for the specific language.

b. Personnel awarded language NEC codes must recertify language proficiency annually, and report results to NETPDC.

c. For languages that do not have a course or a DoD approved test or OPI, the NEC code may be awarded upon approval from OPNAV (N13F).

d. NEC codes for language are based on DoD language trigraphs, which are occasionally revised. NEC codes comprised of obsolete trigraphs are marked with a double asterisk (**).

PLANNING SERIES NEC CODES

Planning NEC codes are approved for planning purposes only. These NEC codes may be used in conjunction with Navy Training Plans, in developing planned training courses, and other applicable long-range projects. Planning NEC codes are established for assignment on manpower authorizations in the Navy Manpower Requirements System (NMRS) to project requirements in Preliminary Ship Manpower Documents (PSMDs) and Preliminary Squadron Manpower Documents (PSQMDs); and other planning purposes. However, they are not assigned to personnel or billets in the Total Force Manpower Management System (TFMMS).

NEC CODE PROPOSAL TEMPLATES

A. INTRODUCTION

This Appendix provides guidance on how to prepare and submit recommendations for *establishing*, *disestablishing*, or *revising* Navy Enlisted Classification (NEC) codes. The Navy Manpower Analysis Center (NAVMAC) is the administrator for all proposals submitted to the Navy Enlisted Occupational Classification System (NEOCS) process for approval. ***ALL*** proposals ***shall*** be submitted by an Echelon 3 or higher activity, and those having an impact on the student Individuals Account (IA) ***shall*** be submitted via their enterprise Primary Advisor (i.e., OPNAV (N2/N6, N95, N96, N97, N98) (endorsement letter, Figure A-3, ***MUST*** accompany proposal) to: Director, Navy Manpower Analysis Center (Code 10), 5722 Integrity Drive, Millington, TN 38054-5011 or navmac_neocs@navy.mil. Proposals which do not have an impact on the student IA (e.g. Planning/Tracking NEC code establishments, PQS/JQR/OJT awardable NEC code establishments) ***DO NOT*** require a preliminary endorsement letter. However, ***IF*** the proposal identifies additional coordination Via activities who have equity in the requirement other than a funding impact, the originator ***shall*** obtain a signed endorsement prior to submission from those activities as well, which ***MUST*** also accompany the formal proposal for processing. ***ALL*** Acquisition related proposals for NEC codes ***shall*** be approved and endorsed by the Assistant Secretary of the Navy (ASN) for Research, Development and Acquisition (RDA) - Director, Acquisition Career Management (DACM) office. Please note that although technical merit is a primary consideration in a NEC code proposal, NEC code actions will always be finalized in light of resources, programming, and personnel management implications.

B. METHODOLOGY FOR ESTABLISHING NEC CODES

1. The NEOCS Board will review and decide upon all new NEC code proposals. NAVMAC is responsible for Board administration and technical assistance in developing and implementing changes to the enlisted classification system. OPNAVINST 1223.1 (series) details NEOCS Board composition and responsibilities.

2. ***Criteria for Establishing NEC codes***. The NEOCS Board reviews all requests for new NEC codes considering following technical criteria:

a. The NEC code must not duplicate Occupational Standards.

b. Skill identification needs must be long term.

c. The proposed NEC code must not reflect routine fleet training.

d. There must be a need to document the skill in the Enlisted Master Record (EMR).

e. The skill identification must be necessary throughout the Navy.

f. The proposed NEC code must reflect workload required to support new equipment.

NOTE: A good rule when drafting or reviewing new NEC code requests is to justify the Navy's need to ***identify a skill over five to ten years***.

3. ***NEC Code Establishment***.

a. *Rating Career Field, and Special Career Field NEC Codes*. Figures A-1 and A-2 identify the information and format required to establish a Rating Career Field or Special Career Field NEC codes. Submit recommendations to establish a NEC code 180 days before the date the NEC code is to be awarded, i.e., 180 days before completion of initial course/factory training.

b. *Planning NEC Codes*. Figure A-2, paragraphs 1.a., d., h. (2), k., q., r., s., t., u., v, and w. identify the information required to establish a Planning NEC code. Submit recommendations to convert Planning NEC codes to Rating Career Field or Special Career Field NEC codes 180 days before the date the NEC code is to be awarded, (i.e., 180 days before completion of initial course/factory training) using all components of Figure A-2.

c. *Tracking NEC Codes*. Figure A-2 identifies the information and format required to establish a Tracking NEC code, all information which makes reference to billets (paragraphs 1.i., and k.) is not required.

NOTE: To revise an existing Tracking NEC code (personnel only) for assignment to billets and personnel, proposal ***MUST*** be submitted utilizing Figure A-4 to include billet information. ***ALL funding implications MUST be clearly stated as having an offset, planned/programed (POM) for or APPROVED; and endorsed utilizing Figure A-3.***

4. ***NEC Code Revision***. All recommendations to revise an NEC code must identify the proposed change and state the justification/rationale for the revision. Revisions which involve a change from OJT to course mandatory training also should address resource implications. Use standard Navy letter format as identified in Figure A-4 when submitting requests for NEC code revisions.

EXCEPTION: When revising an existing Tracking NEC code to include assignment to billets, Figure A-2 ***MUST*** be utilized as stated above for new establishments; however, the proposal will be processed as a revision and the Subj: line ***shall*** be annotated as such.

5. ***NEC Code Disestablishment***. All recommendations to disestablish a NEC code must state the reason or rationale for disestablishment and any required billet and/or personnel recoding action. Use standard Navy letter format as identified in Figure A-5 when submitting requests for NEC code disestablishments.

C. NEC CODE CONSTRUCT

1. The first character is alphanumeric indicating the specific Enlisted Career Field (AXXX-WXXX); or that the NEC code is open to multiple Enlisted Career Fields (7XXX/8XXX). All language NEC codes begin with 9 and the DoD/DoW mandated three character language tri-graph is added, e.g. 9KUR (Kurdish). All Career Fields are identified in Figure A-1 below.

a. NEC codes with associated training that is not blocked ends with a letter (XXXA-XXXZ); prerequisite C/F schools, OJT/JQR/PQS, and Factor/Cadre training.

b. NEC codes with associated training that is blocked ends with a number (XXX2, XXX1, XXX0); prerequisite A school training that identifies the number of blocks remaining, e.g. Block 0, Block 1, and Block 2 which means there are 3 NEC codes established (0 = fully trained).

(b) OPNAVINST 1223.1 (series)
(c) List additional references that relate to this proposal

1. Request establishment of a new NEC code per references (a) and (b).

a. NEC Code and title. Recommend a NEC code number and a title. Use the ***first character Career Field and three Xs*** (e.g., AXXX).

b. Sequence Code. Recommend a sequence code for prioritizing the NEC code on the Enlisted Master Record. See Chapter I paragraph C., 4. for sequence code discussion.

c. Description. Describe the proposed NEC code by identifying the job tasks to be performed; particularly what skill-sets the NEC code provides that is not associated with a rating.

d. Source Rating(s). List the rating(s) associated with the NEC code (e.g., BM only, BM and QM, or BM, QM, GM).

e. Component NEC. Identify any prerequisite skill(s) (Component NEC) that a member must have earned before being awarded the principle NEC code, if any. Under normal circumstances the Component NEC is removed once the principal NEC code is awarded. However, with sufficient justification for unique situations such as community management initiatives or legacy retainment purposes, the Component NEC may be retained in the members EMR; the stipulation for retainment will be annotated in the NOTE section of the principal NEC code. If multiple Component NECs, identify and/or requirement (AXXX and 7XXX) (AXXX or 7XXX).

f. Related NEC. Identify existing NEC(s) similar in scope to the proposed NEC (Related NEC), if any.

g. Cost Analysis. Determines the effect on students IA in terms of Manpower Personnel Navy (MPN) in man-years. This calculation should include all net changes to training courses that are associated with changing or establishing a new NEC. Calculate the MPN in man-years for students in the IA by multiplying the expected annual throughput of students by the course length in days (including weekends) and dividing by 365. Cost Analysis not applicable (N/A) for Tracking and Planning NEC code establishments, no student Individual Account (IA) impact.

Calculation: MPN (man-years) = # Students per Year * # Days in Course / 365.

NOTE: For some courses, the number of students in the first year will be much higher than the expected steady state throughput in order to get the initial batch of personnel trained. If this is the case, provide MPN calculations for first year and for out years.

EXAMPLE: A new course is created to train operators on a new piece of equipment. There will be 300 students in the first year and 100 students annually after that. The course lasts 19 days (15 days of training plus 4 weekend days).

First year MPN = 300 * 19 / 365 = 15.6 man-years.
Out year MPN = 100 * 19 / 365 = 5.2 man-years.

h. Training/Offsets. List the training needed to earn the proposed NEC code, the implications it may have on TAD training, and the impact it may have on increasing overall cost to the Navy in the out-years. Offsets MUST be identified with submission of your proposal. Offsets are required to cover the expected follow-on training costs. Acceptable offsets for student IA may be reduced time-to-train or reduced annual throughput in related NEC codes; elimination of related NEC codes; transfer of end strength from the force structure to the student account; or successful POM actions. NEC code requests that will cause an increase in the number of instructors or increase in TDI expenses also require offsets in MPN and/or OMN funding. Requests that do not have identified offsets, will not receive concurrence when routed for approval.

FIGURE A-2. NEC CODE ESTABLISHMENT PROPOSAL - FIRST PAGE (TEMPLATE)

Subj: PROPOSAL TO ESTABLISH/REVISE (Tracking NEC code) NAVY ENLISTED CLASSIFICATION (NEC) CODE ***(annotate the first character Career Field (Figure A-1) and three Xs (e.g. AXXX) and the proposed title here)***

(1) Identify whether the NEC code will be awarded through formal training or through OJT.
(2) State whether the course is new or on-going. If new, state the ready-for-training date.
(3) List CIN/CDP when a formal training course is required. If CIN/CDP is unknown, list training as "under development" and establishment must be for a Planning NEC code if intended to be assigned to billets.
(4) List the length of training (actual classroom days). **(N/A for Tracking and Planning NEC codes)**
(5) Any establishments, revisions etc., to CIN/CDP should be addressed to NETC.
(6) Increase/savings to course length. **(N/A for Tracking and Planning NEC codes)**
(7) Will difference course be required?
(8) Can this be done through non-traditional training sites, or by internet-based course?
(9) How does this fit into Navy Training System Plan (NTSP)? (Contact appropriate SYSCOM for info)
(10) If this is replacing another NEC or school, to what percent? How many personnel went through previous NEC, and how long was the course (man-years)?
(11) Projected number of student through-put per year (first year through the out-years)? **(N/A for Tracking and Planning NEC codes).**

NOTE: Unless otherwise directed, the originator of a request for an NEC code establishment is responsible for ensuring entry of proper course data into the corporate enterprise Training Activity Resource System (CeTARS) as an integral part of the process.

i. Number of Billets. Identify the approximate number of billets requiring the NEC. **(N/A for Tracking and Planning NEC codes).**

j. Personnel Paygrade. Identify the paygrade range for personnel who will hold the NEC (e.g., E4 - E5, E6 - E9).

k. Billet Paygrade. Identify the paygrade range for billet identified with this NEC (e.g., E4 - E5, E6 - E9). **(N/A for Tracking NEC codes)**

l. Special Qualifications/Stipulations. Identify special qualifications associated with the NEC code (i.e. a security clearance, 20/20 vision, certifications); specific criteria for recertification and any related timelines shall also be addressed; any other special stipulations required for awarding and/or assignment. It is also very prudent for accurate NEC code management that the Primary and Technical Advisors conduct, ***at a minimum***, an annual review of ***ALL*** NEC codes under their purview for validity. The Catalog of Navy Training Courses (CANTRAC) is the authoritative source for specific training, certification/recertification, and other requisite requirements such as physical stature attributes that ***MUST*** be maintained by an individual.

m. Skill Identification. Indicate whether the proposed skill (NEC) currently exists as part of a rating or another NEC code.

n. Legacy NEC Code. Identifies the NEC code established prior to the 1 October 2017 RRL/BL new construct implementation. Will be left blank for new establishments approved after 1 October 2017.

o. Inactive Duty Select Reservists. Identify the applicable inactive duty Selected Reserve (SELRES) category for the NEC from the following listing and provide supporting rationale. Coordinate your recommendation with OPNAV (N951G). (N/A for Planning NEC code)

Category "A": The NEC code is attainable by SELRES, and is therefore assignable to SELRES personnel and manpower requirements with no restrictions. SELRES are able to complete training for the NEC code within three years of normal inactive duty training cycles of 48 regular drills and two weeks Annual Training (AT) per year (Training Category (TRC) A). The NEC code can be earned by the following means:

- Active Duty formal training courses that have not been modified or segmented into modules for SELRES applications,

- Segmented or modularized formal training courses that may be completed within three years of normal TRC A training cycles (Note 1),

- Specific civilian training/certification (Note 2), or

- OJT that can be completed with three years of normal TRC A training cycles (Note 2).

Additionally, NEC codes are assignable to SELRES manpower requirements if the formal courses of instruction that award the NEC code will be modified to facilitate SELRES completion of all requirements for the NEC code within three years of normal TRC A training cycles. The requirements for periodic recertification/requalification for the NEC code cannot exceed a normal, annual TRC A training cycle (Note 1).

Category "R": The NEC code cannot normally be attained by SELRES within three years or normal TRC A training cycles; however, is assignable with restrictions to SELRES manpower requirements if SELRES already holding a NEC code in this category can maintain periodic recertification/requalification required for the NEC code within a normal, annual TRC A training cycle.

FIGURE A-2. NEC CODE ESTABLISHMENT PROPOSAL - SECOND PAGE (TEMPLATE)

Subj: PROPOSAL TO ESTABLISH/REVISE (Tracking NEC code) NAVY ENLISTED CLASSIFICATION (NEC) CODE ***(annotate the first character Career Field (Figure A-1) and three Xs (e.g. AXXX) and the proposed title here)***

Category "N": The NEC code is not assignable to SELRES personnel or manpower requirements because periodic recertification/requalification for the NEC code cannot be maintained by a SELRES during a normal, annual TRC A training cycle. Programming of SELRES manpower requirements with these NEC codes is not authorized.

NOTE 1: A formal training course that awards the NEC code or maintains recertification/requalification may be segmented into modules if recommended by COMNAVRESFOR, approved by OPNAV (N12)/NETC and certified to be funded for segmentation by the appropriate OPNAV resource sponsor. If the Training Agent certifies that the training course will be on line within one year, assignment of the NR IND of A is allowed.

NOTE 2: NEC codes will be awarded to SELRES personnel upon completion of civilian training courses leading to the awarding of a certificate, diploma or license, and for the completion of OJT when a waiver of formal training requirements has been requested and obtained from the appropriate Training Agent.

NOTE 3: COMNAVRESFOR will annually review and coordinate the update of all SELRES NEC code categories with the appropriate NEC Advisors.

p. Coordination. The primary advisor should **look** at all cost associated with the establishment and **provide** a cost estimate for the establishment and **agree** to assume all associated cost. If TAD cost are associated with the establishment TYCOMS should be **notified and agree** to assume any associated TAD cost. **(No student IA impact, N/A for Planning NEC code)**

NOTE: Originator shall obtain a signed endorsement from activity identified in their proposal on the VIA: line, ***signed endorsement shall accompany proposal.*** **Originator is responsible for contacting appropriate commands for this info prior to submission. The** ***accompanying endorsement letter(s) shall CLEARLY communicate acceptance of responsibility for any funding (i.e. training and/or systems) implications, and said funding has been APPROVED in support of subject NEC code establishment(s) (Figure A-3).***

q. Directives. Identify special directives associated with the proposed NEC code, such as instructions or manuals.

r. Justification. Explain the purpose of the proposed NEC code and how it will impact manpower increases/decreases. Be as specific as possible.

s. Platform/Equipment. Identify the new platform(s) and/or equipment the proposed NEC code will support.

1. Identify the "phase in" period for new platform(s), equipment, and training.

2. Is the proposed NEC code replacing an existing NEC code? If yes:

a) When is the old platform(s) or equipment no longer in service; and

b) Identify the date the NEC code being replaced may be deleted.

t. Occupation Standards. When requesting establishment of a Rating Series NEC code, indicate whether the proposed NEC code does or does not duplicate existing Occupational Standards for the rating(s) involved, NAVPERS 18068F, Volume I identifies rating specific occupational standards. (N/A for Planning NEC code)

u. Workload Measurements. When requesting the establishment of a NEC code, identify workload levels for each new equipment. The work may be generated either by watch station requirements, Planned Maintenance (PM), Corrective Maintenance (CM), or by other specific mission essential elements. The work could be supported by any combination of the preceding types of workload.

v. Primary Advisor/Technical Advisor/Enlisted Community Manager. Provide the abbreviated activity name, along with the specific internal code responsible for subject NEC code, which identifies the respective Primary Advisor/Technical Advisor/Enlisted Community Manager.

w. Point of Contact. Identify the name, telephone number (commercial and DSN), and E-Mail address of a person knowledgeable about the proposed NEC code.

RATING STRUCTURE CHANGE PROPOSAL TEMPLATE

A. INTRODUCTION

This Appendix provides guidance on how to prepare and submit recommendations for *establishing*, *revising*, *merging*, or *disestablishing* Navy ratings. The Navy Manpower Analysis Center (NAVMAC) is the administrator for all proposals submitted to the Navy Enlisted Occupational Classification System (NEOCS) Board for the review and approval process. ***ALL*** proposals ***shall*** be submitted by an Echelon 3 or higher activity to: Director, Navy Manpower Analysis Center (Code 10), 5722 Integrity Drive, Millington, TN 38054-5011 or navmac_neocs@navy.mil. Please note that although technical merit is a primary consideration in a rating structure proposal, proposed actions will always be finalized in light of resources, programming, and personnel management implications.

B. METHODOLOGY FOR ESTABLISHING RATINGS

1. The NEOCS Board is a standing board and serves as the central monitoring and control point for system changes to ratings and overall system direction. The NEOCS Board formally reviews all proposals and supplies relevant data to the chain of command to assist in the review and approval process. The Executive Secretary of the NEOCS Board processes all changes to the rating structure. The Deputy Chief of Naval Operations (Manpower, Personnel, Training, and Education), approves policy and modifications to existing ratings including the establishment, revision, merging, and disestablishment of service ratings. Under the authority of Title 10 U.S.C. 6013, the Secretary of the Navy approves the establishment and disestablishment of general ratings.

2. ***Criteria for Navy Ratings.*** The following considerations are intended for use in developing proposals to establish new ratings:

a. Must apply to the regular Navy and Naval Reserve in peacetime and wartime with no basic change in structure during mobilization;

b. Must provide necessary generalization in paygrades E-4 through E-6 to ensure the availability of broadly qualified senior petty officers capable of supervising any work in their rating;

c. Must provide the fleet with a rating that can, with other ratings, accomplish all necessary tasks, yet possess specific knowledge and skills different from other ratings;

d. Must be useful at sea, ashore, or at an overseas activity;

e. Should be composed of occupational (work) content in sufficient scope and range so that the rating comprises a family of related jobs;

f. Should require essentially the same basic experience, training, techniques, abilities and physical and mental capacities;

g. Should involve a sufficient number of personnel to establish the need for training programs and related administrative functions;

h. Should have a skill level and qualifications structure; and

i. Should provide workload equity among ratings as far as practicable.

3. ***NEOCS Board concerns.*** The following questions highlight some of the major issues evaluated by the NEOCS Board during the rating proposal review process. Proposals should address the following questions:

a. Is the proposal for a general rating, or rating merger?

b. What are the operational requirements of the proposed rating; why is it necessary?

c. If the proposal is for a rating, what related service ratings, if any, are required?

d. If the proposed rating contains service ratings, what proportion should be assigned to each service rating?

e. What is the title of the proposed rating?

f. What tasks and duties will personnel in the proposed rating be required to perform?

g. How will the work requirements be assigned among the paygrades?

h. To what extent will the level of skill and knowledge increase with each higher paygrade?

i. What degree of formal and on-the-job training is required?

j. What special personal qualifications are needed for the new rating (mental, physical or other requirements)?

k. To what Limited Duty Officer (LDO) and Chief Warrant Officer (CWO) classifications would personnel in the rating advance?

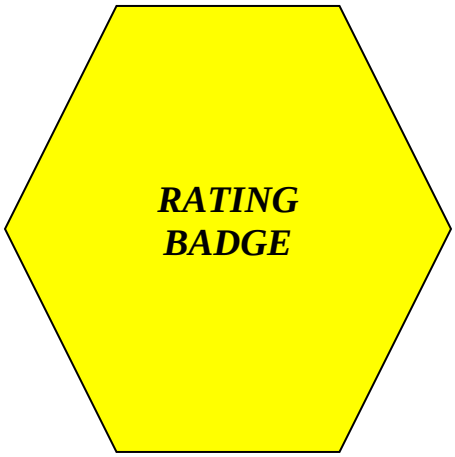
Proposal to ***Establish/Revise/Disestablish/Merge (<u>Rating And Rating)</u>***



1. **Purpose**: Mention any steering committee meetings or groups that met to review rating issues and policies, project future requirements and make recommendations, which would include the concept brief given to the Manpower, Personnel and Training Working Group (MPTWG) for concept development.

2. **Justification**: Explanation of how it will benefit the Navy and the Sailors. Examples of Sailors' benefits could be promotion opportunities, diversity of assignments and/or training etc.

3. **Rating Scope**: To include existing/proposed. Individual Learning Centers or Enlisted Community Managers would provide this.

4. **Career Path**: To included existing/proposed. Current Career Path can be found in NAVPERS 18068F. Should include advancement opportunities.

5. **Billet Structure**: To include existing/proposed. Break-down of Sea and Shore rotation. This would be the Enlisted Programmed Authorization (EPA) Structure. Include Reserve EPA Tables (existing/proposed). Should include explanation how the new billet structure would be displayed. If excess billets will be achieved with the merger, should include explanation on how the excess billets would be recoded (sea/shore). If additional billets are required, include an explanation on where the compensation would come from. Is there workload to support additional billets? Who will pay for the additional billets?

6. **Personnel Inventory**: To include existing/proposed. Separate tables for active and reserve. Give total number of personnel and display percentage breakdown by paygrade. If all current personnel are not required in the new proposed rating, how will conversions be handled?

7. **Training**: To include existing/proposed (what schools, location, duration, CBT, OJT etc). Need to state who will absorb the cost if there is a training requirement increase. Will there be a difference course (for the higher paygrades) offered when the merger is complete? Will CDs need to be developed? Will PCS be involved if training sites move or if a new training site is established. Has the PCS been planned for? Does the Navy have resources (trainers) to train at the new proposed site? Consider training sites that award an NEC. Is there going to be an Individual Accounts (IA) increase? Will these schools be consolidated?

8. **Primary/Enterprise Resource Sponsor/OPNAV (N10)**: A statement to the effect they will ensure the cost associated with the rating merger will be programmed for as required.

9. **NEC Code (s)**: Will a new NEC code (s) need to be established? Will NEC codes need to be merged? Will NEC codes need to be disestablished? Will source ratings need to be revised or added? School producing NEC codes should be addressed under Training.

10. **Clearance Issues/Naturalization Issues**: To include existing. Will this change once the ratings are merged? How will the billets and personnel be affected? Due to the backlog of SCI security clearance adjudications, it is imperative to discuss any issues this backlog causes WRT to accomplishing the mission (i.e. junior Sailors may sit at a PCS duty station for over a year before getting a final TS SCI security clearance, so what are we going to do prior to their arrival to shorten this time lag?)

11. **Reserves:** Impact. How will they handle the conversion? Does anything pose a problem for the Reserves (i.e. cost, women, time requirements, etc)?

12. **Facilities/Equipment**: MILCON issues, equipment purchases, etc.

13. **Sea/Shore Rotation**: To include existing/proposed (ECM can give you this information). If the existing is changing, give an explanation.

14. **Rating Badge:** Will existing badge remain or will it change? If change is needed, notify the NEXCOM, and in the proposal state what it will be and if the name changes, add that as well.

15. **Timeframe**: Here you will need to explain the timeframe involved to implement the proposal. (i.e. will you do E9 & E8, then E7, and E6 and below) or will the implementation occur all at one time? When will conversion be completed?

16. **Summary**: Pros and cons. Closing remarks.

Subject: PROPOSAL TO ***ESTABLISH/REVISE/DISESTABLISH/MERGE (RATING AND RATING)***

(PROPOSAL TO ESTABLISH THE SUBMARINE INFORMATION SYSTEMS TECHNICIAN (ITS) SERVICE RATING)

1. **Executive Issues:**

- ***Currently the "A" and "B" ratings are too small to effectively manage community health***.
    - ***Very limited promotion opportunities due to very little turnover at E7-E9***.
    - ***Small changes in EPA have significant impact to community health***.
    - ***Small changes in losses/gains have significant impact to community health (e.g. over assess or excessive losses)***.

- ***The action proposed is required to ensure SWE ratings maintain enough inventory to provide operationally relevant Sailors to meet fleet management and training requirements while providing Sailors a viable career in a surface rating.***

2. **Background:**

- ***Bullets.***

3. **Discussion:**

- ***Bullets.***
