As a retiree, you’re still an important part of the Navy-Marine Corps Team

SECNAV Navy and Marine Corps Retiree Council

As a Navy or Marine Corps retiree, you’re recognized as an individual with a continuing military status. You’re part of the Total Force and are entitled to certain rights, benefits, and privileges. You’re also subject to responsibilities arising from these entitlements.

You remain a vital part of the Navy-Marine Corps team.

To be a contributing member of the team, you need to know about changing programs and policies. That’s where the Department of the Navy’s Retired Activities Program comes in. It provides an avenue to ensure the relationships between retirees and the Navy and Marine Corps are reinforced and mutually beneficial. It helps keep you informed. The program consists of four principal elements:

- Navy and Marine Corps Retiree Council,
- Retiree Seminars/Retiree Appreciation Days,
- Retired Activities Offices (RAOs)/Retired Liaison Offices (RLOs), and
- Shift Colors (Navy) and Semper Fi-delis (USMC) newsletters for retirees.

The Navy and Marine Corps Retiree Council considers issues of major importance to military retirees and their family members. It facilitates interaction between Department of Navy leadership and the Navy-Marine Corps retiree community and facilitates participation in other aspects of the Retired Activities Program.

The Retiree Council is currently co-chaired by retired Marine Lt. Gen. Pete Osman and retired Master Chief Petty Officer of the Navy James Herdt. Retired Navy Capt. Martin Menez is the Council Chief of Staff.

Council members may review the effectiveness of current programs and policies affecting retirees and make recommendations concerning improve-

“Many thanks to Shift Colors for this opportunity to address my shipmates.

It’s important for all to realize that your representatives on the Secretary of the Navy’s Retiree Council have shown tremendous dedication, perseverance, and creativity during the pandemic. We have been forced to conduct all our meetings virtually to include our annual weeklong meeting in 2020. In spite of the IT challenges, your Retiree Council has been able to continue its work, generating quality products while addressing many issues of great importance to our retired community. We were forced to suspend our activities for 10 months during the Secretary of Defense’s Zero-based Review of all Boards and Councils, but once reactivated, we hit the ground running.

MCPON Herdt and I briefed the new Assistant Secretary of the Navy on our proposed way ahead and immediately conducted a quarterly meeting of the Council. We are looking forward to our annual week-long gathering in Washington in August where we will continue to address issues of importance to you and your families.”

Lt. Gen. Pete Osman

COUNCIL from Page 1

“The members of the SECNAV Retiree Council consider it a n honor and privi-
lege to represent all Department of the Navy retirees in surfacing and
addressing the issues important to retirees. We welcome all input on
those issues, look forward to exploring the facts surrounding them and, if war-
anted, addressing them to the chain of command.”

ments to benefits, privileges, assistance, quality of life, morale, and any other
matters relating to retired personnel.

The Retiree Council reflects the breadth of the Navy and Marine Corps
retired community, including retired enlisted and officers from the Navy
and Marine Corps’ active and Reserve components. Retiree Council members
reflect special interests such as medical, legal, and wounded, ill, and injured.

In addition to a yearly multi-day conference,
the Council meets briefly on a
quarterly basis. The Council currently
has three committees: Health Affairs, Outreach/Overseas, and Compensation.
Council committees identify issues affect-
ing Navy and Marine Corps retirees and
their families, then submit point papers
to the Secretary detailing the issues and
suggesting solutions.

Watch for Retiree Council announce-
ments and other news in upcoming edi-
tions of Shift Colors and Semper Fidelis.

For more information about the Retiree
Council and how to apply, click here.

For detailed information, refer to SEC-
NAV Instruction 5420.169K, Department
of the Navy Retired Activities Program.
Your concerns and issues are very
important to us. If you have questions,
issues or ideas for the Navy and Marine
Corps Retiree Council, you can contact your
nearest Navy Retired Activities Office (RAO), located on page 22 of this
magazine.

New myPay account keeps Gray Area Retirees informed, connected between final drill, pay

Submitted by DFAS

Navy Reserve Gray Area Retirees: there is a new avenue to stay connected and informed between the time you stop drilling and the time you start receiving retired pay.

It’s a new kind of myPay account especially for Military Gray Area Retirees.

Who are Gray Area Retirees?

Gray Area Retirees are members who served in the Reserves or Guard and qualified for retired pay, have retired from their service (stopped drilling), but are not yet at the age where they can start receiving retired pay. The time between their retirement from the service and the date when they are eligible to begin receiving pay is the “gray area.” The “gray area” applies even if the member is in the Retired Reserve.

A Guard or Reserve member is generally not eligible to start receiving retired pay until they reach age 60. However, some periods of active duty or active service can reduce the age requirement below 60 years of age (Reduced Age Retirement). The earliest age that a Gray Area Retiree can start receiving reduced age retired pay is age 50.

The New Gray Area “Future Retiree” myPay Account

If you are a Gray Area Retiree who uses your new myPay account to keep your contact information updated, you will benefit from receiving important information from the Navy and from DFAS, such as news about changes in laws or policies that impact your retirement benefits, reminders about applying for retired pay, and this newsletter.

Plus, when you have current contact information in your new myPay account, when DFAS receives a completed application for retired pay, DFAS will send email status notifications to you: when we receive the application, when we begin working on the application, and when we complete it. Note: Gray Area Sailors should always work with their Branch of Service to complete their retired pay application.

In the new basic Gray Area “Future Retiree” myPay account, you can confirm or update your email address and your mailing address. And when you apply for retired pay, you can also use it to make sure your direct deposit information is current.

If you are a Navy Gray Area aka Retired Reservist, and need more information about how to apply for your retired pay and benefits, please consider attending an upcoming Reserve Retirement Waypoint event, hosted by Navy Personnel Command. Upcoming events include April 27, June 21, and Sept. 20.

In addition to these events, outreach events will also be conducted in person for the FY22 Retirement Awareness Workshop at NSA Mid-South in Millington, Tennessee, May 3-5; and for the Reserve Retirement Counseling Session during the drill weekend at NRC Quincy, Massachusetts, July 9-10 2022.

For more information, visit Retirement Transition Outreach at the MyNavyHR website here, or email pers-9_RTO@us.navy.mil.

If you used myPay when you were drilling, you know it’s accessible online from your computer’s web browser. However, you might not know that myPay is now more mobile-friendly. That means it’s easier to manage your account using the web browser on your connected device, like your smartphone or tablet. There’s also a new feature to help you keep your account secure, two-factor authentication.

How to Access a Gray Area Future Retiree myPay Account

DFAS has a helpful downloadable Gray Area Future Retiree myPay Login Tips PDF with specific instructions at: https://www.dfas.mil/grayarea.

Get Connected and Informed

Log into your new myPay account and confirm/update your contact information so you can get connected and informed.

DFAS also has a special webpage with information for Gray Area Retirees on their website here.

Need a new ID card? Here are some helpful tips

Beginning in the summer of 2021, DoD began issuing Uniformed Ser-

vices Identification Card transitions the current ID card to plastic cardstock with enhanced security features. ID card issuance facilities will issue Next Gen USID cards to those with expiring ID cards.

Individuals with older cards that have an indefinite expiration date (INDEF) may exchange those cards for Next Gen USID cards at their convenience by following the instructions in the section How do I Get a New ID Card.

Individuals with older cards that have an expiration date should follow the regular replacement process, applying for a new ID within 90 days of expiration. Cards will not be reissued solely for the purpose of upgrading to Next Gen.

To renew your card, bring two forms of ID. One must be an unexpired, federal- or state-issued photo ID. If you are disabled or have an incapacitated dependent and cannot get to an ID office, you may be able obtain a new card by mail from the nearest ID card office. Locate your nearest ID card office by using the RAPIDS site locator.

Retired Activities Office volunteers needed

Retired Activities Offices are made up of retired volunteers from all services, including surviving spouses. Their charter is to coordinate, establish and staff an office on an active duty, Reserve or Guard base, through command channels, that will assist retirees and surviving spouses with myriad actions.

These actions include serving as an information center for TRICARE, base services, etc.; offering referrals for financial assistance and pay matters; counseling active-duty personnel nearing retirement.

Another major activity involves working with base agencies to set up Retiree Appreciation Day events offering briefings by different agencies on respective services, tax preparation and advice (at selected locations), staff judge advocate assistance, base tours, the Defense Finance and Accounting Service, etc.

If you find that you have some extra time on your hands and would like to get involved in a worthwhile activity, contact your nearest RAO and volunteer, they can all use some help. For contact information, see page 22.

New myPay account keeps Gray Area Retirees informed, connected between final drill, pay

Need a new ID card? Here are some helpful tips

Beginning in the summer of 2021, DoD began issuing Uniformed Service Identification (USID) cards with indefinite expiration dates to dependent spouses and other eligible individuals at age 65 (previously age 75). This issuance does not impact cards issued with indefinite expiration dates before 2021. If you are enrolled in the Defense Enrollment Eligibility Reporting System (DEERS), your eligibility can be verified, and the card can be issued at the nearest military ID card issuing office.

The easiest way to make an appointment is by going to the ID Card Office Online (RAPIDS) website. The site has an ID Card Office Locator where you can plug in your zip code and find the closest office to you. Many offices are not answering their phones, so it’s best to make an appointment online. If you cannot find an available appointment, you may need to widen your search radius and look further out. Some offices also have walk-in hours.

Benefits should apply for a new card when the existing card is 90 days short of expiration. Many locations have a bizclog, so make an appointment well in advance.

The Next Generation Uniformed Services Identification Card transitions the current ID card to plastic cardstock with enhanced security features. ID card issuance facilities will issue Next Gen USID cards to those with expiring ID cards.

Individuals with older cards that have an indefinite expiration date (INDEF) may exchange those cards for Next Gen USID cards at their convenience by following the instructions in the section How do I Get a New ID Card.

Individuals with older cards that have an expiration date should follow the regular replacement process, applying for a new ID within 90 days of expiration. Cards will not be reissued solely for the purpose of upgrading to Next Gen.

To renew your card, bring two forms of ID. One must be an unexpired, federal- or state-issued photo ID. If you are disabled or have an incapacitated dependent and cannot get to an ID office, you may be able obtain a new card by mail from the nearest ID card office.

Locate your nearest ID card office by using the RAPIDS site locator.

Naval Small Craft Instruction and Technical Training School (NAVSCIATTS) students from Estonia, Germany, Poland, and Romania participate in a Patrol Craft Officer Riverine (PCOR) training exercise on the Pearl River, near the John C. Stennis Space Center, Mississippi. The seven-week course of instruction is designed to provide international students – 13,000 students from 120 partner nations to date – with the knowledge and skills to operate a PCOR.

Retired Activities Office volunteers needed

Retired Activities Offices are made up of retired volunteers from all services, including surviving spouses. Their charter is to coordinate, establish and staff an office on an active duty, Reserve or Guard base, through command channels, that will assist retirees and surviving spouses with myriad actions.

A new day for ‘Old Ironsides’
Navy’s oldest serving warship has its first woman commander

By MC2 Grant Grady
USS Constitution Public Affairs Office

Cmdr. Farrell became Old Ironsides’ 77th commanding officer and the first woman to serve as the ship’s commanding officer in the ship’s 224 years of history, dating back to 1797.

“There is a picture floating around of me standing next to this remarkable ship back in 1998,” said Farrell. “I could never have imagined that 24 years later that I’d be here today taking command of Old Ironsides. USS Constitution serves as a living piece of history. She can be visited and experienced firsthand, connecting us to those who had a vision of what this country and government would be. She is also a somber reminder of those service members that gave the ultimate sacrifice on her decks to create the nation we know today.”

Farrell previously served as the executive officer aboard the Ticonderoga-class guided missile cruiser USS Vicksburg (CG 69). She is a native of Paducah, Kentucky, and a graduate of the U.S. Naval Academy and the University of Arkansas. As USS Constitution’s crew welcomed Farrell’s historic achievement, they said farewell to the ship’s 76th commanding officer, and local Dedham, Massachusetts, native.

“I know the crew is in great hands with Commander Farrell,” said Benda. “This historic barrier is long overdue to be broken. I cannot think of a better candidate to serve as USS Constitution’s first female commanding officer. I look forward to watching what she and the crew accomplish in the next few years.”

He served as USS Constitution’s executive officer from 2017 to 2020 before taking command of Old Ironsides in 2019. Benda’s next command will be teaching at the U.S. Naval War College in Newport, Rhode Island.

The first female commissioned officer to serve aboard USS Constitution was Lt. Cmdr. Claire V. Bloom, who served as executive officer and led the historic ship. The first time Old Ironsides sailed under her own power since 1881.

Not getting your Zs? Apnea might be the answer

From the Military Health System

Do you sometimes wake up feeling tired, headachy, or have a sore or dry mouth? These could be symptoms of obstructive sleep apnea, also known as OSA. It’s one of several common sleep disorders. The Sleep Disorders page on the CDC website affects service members.

Getting proper sleep means sleeping at least seven hours a night and sleeping continuously through the night. Good sleep remains vital to service members’ physical and psychological strength and resilience.

“OSA is the most common sleep-related breathing disorder,” said Army Lt. Col. (Dr.) Jennifer Creamer, a sleep specialist at Fort Lee, Virginia. “It can affect your mood, your concentration, and your cognitive performance.”

Creamer explained that OSA is caused by the upper airway collapsing during sleep, which decreases the oxygen levels in your blood, explained Creamer. Your brain senses your breathing problem and wakes you up briefly throughout the night so you can reopen your airway. Symptoms include loud snoring, choking or gasping. The repeated sleep interruptions can make you feel tired, irritable, or confused throughout the day.

“Sleep fragmentation contributes to lighter and less restorative sleep,” said Creamer. It can affect your mood, your performance, and your quality of life.

Who’s at Risk for OSA?

OSA can affect anyone at any age. However, it affects younger men at a higher rate than younger women, Creamer said. Among older people, that gender gap closes. “Sleep apnea increases in women at the time of menopause,” she said. The symptoms for women with OSA are distinct. Women are more likely to have insomnia and less likely to snore or show noticeable pauses in breathing, she explained. Still, several factors can influence a sleep apnea diagnosis, including excessive weight. Other risk factors include advancing age, having a recessed jaw or enlarged tonsils, Creamer added. Sleep apnea can also be linked with other health problems, such as heart, kidney, and pulmonary diseases; high blood pressure; and stroke, she said. It can also contribute to depression or anxiety.

How Is It Diagnosed?

Health care providers can evaluate people at risk for OSA and order a sleep study to confirm evidence of the disorder. Some sleep studies require a patient to stay overnight in a sleep lab. Home sleep tests are also available. During an overnight lab study, a technician attaches electrodes to your scalp to record your brain waves. They also monitor your breathing, the oxygen levels in your blood and your heart rate as well as your eye and leg movements during the night.

The home tests use breathing monitors with sensors that track your breathing and oxygen levels. One type has a probe that goes over your finger and the other has probes over your finger, under your nose, and on chest belts.

A service member participates in a sleep study at Madigan Army Medical Center, Joint Base Lewis-McChord in Washington. Sleep technicians connect 26 sensors to patients that measure eye and muscle movements, brain activity, heart rate, and breathing.

How Is It Treated?

Depending on each patient, doctors can recommend numerous treatments for mild OSA. Losing weight can be helpful. Another tactic is to change your sleeping position, such as sleeping on your side if your OSA occurs when you sleep on your back, continued Creamer. Reductions in smoking or alcohol consumption can also reduce OSA, according to the National Institutes of Health’s National Heart, Lung and Blood Institute website on sleep apnea.

Another option is to wear a device over your teeth while you sleep. It fits over your teeth like a retainer to keep your jaw in a forward position and keep your airway open. For moderate to severe OSA, treatment options include upper airway surgery or Continuous Positive Airway Pressure, known as CPAP, therapy. CPAP machines use a face mask and mild air pressure to keep the airways open.

For more information, or if you’re concerned that you may have OSA, see your primary care provider for further evaluation. If you meet criteria, your provider can refer you for a sleep study. Some sleep studies are covered by TRICARE.

Rare cancers could be added to VA service-connected list

From the Veterans Administration

WASHINGTON — The Department of Veterans Affairs intends to propose adding certain rare respiratory cancers to the list of presumptive service-connected disabilities in relation to military environmental exposure to particulate matter.

VA determined through a focused review of scientific and medical evidence there is biologic plausibility between airborne hazards, specifically particulate matter, and carcinogenesis of the respiratory tract, and that the unique circumstances of these rare cancers warrant a presumption of service connection.

Based on these findings, VA Secretary is proposing a rule that would add presumptive service connection for several rare respiratory cancers for certain Veterans. The cancers under consideration include:

- Squamous cell carcinoma (larynx).
- Adenocarcinoma (trachea).
- Salivary gland-type tumors (trachea).

VA supports women veteran entrepreneurs in how to obtain government contracts

VA supports women veteran entrepreneurs in how to obtain government contracts

WASHINGTON — Graduates of the Department of Veterans Affairs Women Veteran-Owned Small Business Initiative recently from VetBizLady Start program, panning a way for their future in the federal marketplace.

The inaugural 14-week program, completed in February, provided women transitioning out of the military, tools and resources to manage and grow their small businesses in government contracting.

Training modules and small group discussions were hosted by successful women mentors from the government and commercial sector. The initiative works to bridge the gap between economic disparities by providing disadvantaged populations equal access to contracts.

President of WJM Professional Services LLC Veronica Lane, was one of 20 women veterans who participated.

“I am grateful for completing this program and the opportunity to meet with motivated women veterans,” said Lane. “According to the Small Business Administration, only 15 percent out of 2.5 million veteran-owned businesses are owned by women veterans. The Women Veteran-Owned Small Business Initiative, part of VA’s Office of Small and Disadvantaged Business Utilization, is focused on using VetBizLadyStart to increase awareness of opportunities for women-owned small businesses to increase these numbers.”

VA Chief of Staff Tanya Brader attended the ceremony. “The graduation marks a step toward fulfilling President Biden’s Executive Order Advancing Racial Equity in Underserved Communities,” Brader said. “What better way to answer the call than a program that brings results for our women veterans, who in turn can use these tools to become successful business contractors, bringing opportunities back to those in their communities.”

The EO aims to identify and remove barriers in the federal government that impact the ability of individuals within underserved socioeconomic categories to seek viable economic opportunities.

“VA intends to focus its rule on the rare respiratory cancers above in Veterans who served any amount of time in the South- west Asia theater of operations and other locations. VA will invite and consider public comments as part of this process. Once rulemaking is complete, VA will conduct outreach to impacted veterans and survivors to inform them about potential eligibility.”

Benefits for burn pit illnesses, hypertension from Agent Orange would be granted under new plan

From Fleet Reserve Association

Nearly all veterans who served in overseas conflicts in the last 31 years would be granted presumptive benefits status for a host of respiratory illness and cancers under a sweeping proposal to be introduced by Senate leaders next week. In addition, Vietnam veterans who suffer from high blood pressure would be granted the same presumptive status for their disability claims, potentially handing out billions more in payouts to the aging group.

The legislative package, dubbed the True Cost of War Recognition Act, represents the most ambitious attempt so far by Congress to address long-term health effects of burn pits and other toxic exposure events on veterans who served in wars overseas, both recent and long past. The Senate Veterans’ Affairs Committee chairman said he wants a comprehensive legislative plan on the issue by the end of May.

Outside groups have successfully lobbied in recent years to broaden the number of illnesses linked to the use of the chemical defoliant Agent Orange during the Vietnam War. But hypertension has remained off the list, in large part because Veterans Affairs officials still have not accepted outside scientific studies that have shown a strong link between the two. Similarly, advocates for years have complained that Veterans Affairs officials have done too little to react to rising cases of unusual, serious illnesses among veterans who worked near burn pit smoke during overseas deployments, or were exposed to other potential chemical poisoning on missions.

VA leaders in the past have argued that without more scientific backing — both in understanding what contaminants those chemicals have on the human body — they could only offer partial solutions to the problem. Lawmakers from both the House and Senate Veterans’ Aff airs committee officials have vowed to force changes the issues this year.

Committee leaders are expected to begin public debate on the new legislation as early as next week, with the hope of comprehensive legislative plan on the issue by the end of May.

VA asks for outdoor experience input

WASHINGTON — The Department of Veterans Affairs seeks input from veterans outdoor recreation groups on how it can facilitate the health and wellness of Veterans, their families, caregivers and survivors through improved access to public lands and other outdoor spaces.

Research shows access to the outdoors can contribute significantly to better health and well-being and VA wants to learn how it can best integrate outdoor experiences into its Whole-Health approach to providing care to Veterans and their families, caregivers and survivors.

“We want to use this opportunity to understand how VA can work closely with the Veterans outdoor recreation groups that have been leading the way in using outdoor experiences to help their fellow Veterans heal and stay healthy,” said Deputy Assistant Undersecretary for Health for Patient Care Services Maria Llorente, M.D. “We look forward to collaborating with our partners in making outdoor recreation a foundational piece of VA’s whole-health based care.”

As part of this request for information, VA is asking individuals, groups and entities involved in providing Veterans outdoor recreation to submit comments, from Feb. 23 to March 25, to help guide the work of strengthening the relationship between VA and managers of public lands, identifying barriers that may prevent Veteran access to public lands to augment delivery of health and wellness services, and making recommendations to address those barriers.

The subject document above has officially published in the Federal Register. The official version of this document, supporting documents and additional information about this document is now available at Federal Register public-inspection 2022-03734 request for information on Veterans outdoor recreation.

Vet dental care act of heart for one-time Sailor

John Macdonald at his dentists office in Frontenac, Missouri.

Macdonald said he remembers one veteran who was distraught, having lost all of his teeth before he came for free dentistry work. Having proper dental care can make a difference in someone’s life, he said.

“The path to service is not always straightforward. In this case, it was Macdonald’s heart attack and DAV’s subsequent assistance that ignited a fire in him to want to give back, Becker said.

“His extremely dedicated to helping out people,” Becker said. “It’s hard to see him doing something like this—it’s awesome.”

The Senate Veterans’ Affairs Committee chairman said he wants a comprehensive legislative plan on the issue by the end of May.

Outside groups have successfully lobbied in recent years to broaden the number of illnesses linked to the use of the chemical defoliant Agent Orange during the Vietnam War. But hypertension has remained off the list, in large part because Veterans Affairs officials still have not accepted outside scientific studies that have shown a link between the two.

Similarly, advocates for years have complained that Veterans Administration officials have done too little to react to rising cases of unusual, serious illnesses among veterans who worked near burn pit smoke during overseas deployments, or were exposed to other potential chemical poisoning on missions.

Veterans Affairs leaders in the past have argued that without more scientific backing — both in understanding what contaminants troops were exposed to and what long-term health effects those chemicals have on the human body — they could only offer partial solutions to the problem.

Lawmakers from both the House and Senate Veterans’ Affairs committees have vowed to force changes this year. Committee leaders are expected to begin public debate on the new legislation as early as next week, with the hopes of committee votes on the idea before Memorial Day.

A copy of the measure obtained by Military Times shows nine new lung illnesses that would be reclassified as presumed conditions suffering from burn pit related illnesses.

Including hypertension as a presumptive condition for the Agent Orange list is expected to affect around 160,000 veterans. The new legislation also includes an expansion of Agent Orange presumptive status for individuals who served in Thailand, Laos, Cambodia, American Samoa and Guam during the 1960s and 1970s.

The measure also includes new research by VA on the issue of burn pit exposures, to include health trends for post-9/11 veterans and cancer rates among veterans.

Lawmakers have said if they can advance the toxic exposure legislation in both chambers, they are optimistic the entire package could be on the president’s desk for final signature by the end of the year. Implementation of the new presumptive rules would likely push any payouts to late 2022 at the earliest.

In addition, eligible veterans who are diagnosed with any other area later determined by a federal agency where burn pits were used by the military overseas.

That group contains more than 4 million veterans and counting. More than 223,000 individuals have registered on VA’s Open Burn Pit Registry, but outside advocates believe that number likely undercounts the full number of individuals suffering from burn pit related illnesses.

Including hypertension as a presumptive condition for the Agent Orange list is expected to affect around 160,000 veterans. Navy Begins Red Hill Shaft Recovery Operations

Above, Builder Constructionman Adan Zarate Jr., a Rapid Response Team member assigned to Construction Battalion Maintenance Unit (CBMU) 303, delivers water samples for testing. Below, Naval Facilities Engineering Systems Command contractors Will Casappa, left, and Mana Micah remove the used media from granular activated carbon filtration system for storage and processing in support of Joint Base Pearl Harbor-Hickam’s water restoration efforts.

Secretary of the Navy Carlos Del Toro, center, and General Counsel, Department of the Navy John P. Coffey receive a brief on well operation and recovery initiatives from Capt. Burt Hornyak, commanding officer, Fleet Logistics Center Pearl Harbor. The Department of the Navy John P. Coffey, commanding officer, Fleet Logistics Center Pearl Harbor. The Department of Health (DOH), the U.S. Environmental Protection Agency, Army and Navy. The plan includes actions to pump and filter contaminated groundwater from the Navy’s Red Hill Shaft to reduce spread of contamination and protect plants and wildlife. It will also help the IDWST better understand movement and contamination of groundwater.

Each day, the Navy is pumping up to five million gallons of groundwater from the Red Hill Shaft. This creates a capture zone within the aquifer to reduce the spread of groundwater contamination. To remove contaminants inside the well, the Navy will use skimming pumps and an array of booms and absorbent pads. The Navy’s goal is to contain contamination near the shaft and prevent further contamination of the aquifer.

After the water is pumped from the well, it passes through the GAC filtration system before being discharged into Halawa Stream. The purpose of the GAC filtration system is to filter (or clean) the discharged water so it does not pose a threat to human health or the environment. As the water passes through the GAC filtration system, it is closely monitored for contaminants in real time. The Navy will also send water samples to a certified laboratory for testing. The maximum daily amount of water to be discharged into Halawa Stream will be less than one percent of the amount of water in the stream during peak rainwater flow.

The Hawaii Department of Health (DOH) approved a National Pollutant Discharge Elimination System (NPDES) permit Jan. 27, allowing these operations to take place. The permit includes strict requirements to test the water at each step of the GAC filtration system. If contaminant levels exceed acceptable limits, operations will be stopped. DOH staff are on site to monitor permit compliance.

The plan also includes Navy commitments to reuse treated water and undertake projects to improve the upper watershed and recharge the aquifer.

Changes to federal loan forgiveness program will benefit troops, vets and DoD workers

From Fleet Reserve Association

Tens of thousands of troops, veterans and civilian defense workers will see large federal loan debts reduced or erased under changes to the Public Service Loan Forgiveness program recently announced. The move comes amid criticism of the program — designed to provide financial relief to federal workers who make regular payments on their federal loans — for being too cumbersome and uninformed instead of being a benefit of public service.

In response, the Department of Education announced changes to “restore the promise” of the program and “make it easier for members of the military to get credit toward forgiveness while they serve.”

While the loan forgiveness program is not solely focused on service members, they make up a significant portion of program recipients.

Officials said at least 17,000 current troops will benefit from the new rules, but the number could be much higher as staff combs through various loan accounts to see how many of the estimated 550,000 borrowers expected to benefit had some military service.

Under current rules, loan forgiveness recipients must either work full-time at a government job — federal, state, local and military posts are all included — or a not-for-profit, non- partisan organization such as the Peace Corps. It covers individuals who have direct loans or previously consolidated federal student loans and have been paying down the debt for the last 10 years.

The rationale behind the program is to give those public servants financial relief, rather than force them to leave those service jobs to erase their debts. But in the past, rules surrounding those repayments required strict monthly guidelines and only covered certain types of loans. Earlier this week, 60 Minutes profiled multiple service members who paid back tens of thousands of dollars over a decade, only to discover at the end that their loan forgiveness applications had been rejected on technicalities.

Education Department officials Wednesday’s announcement is designed to prevent that from happening again.

“These changes are important steps toward a better and stronger PSLF program, one that will move away from the current situation in which too few borrowers receive forgiveness, and too many do not receive credit for years of payments they made because of complicated eligibility rules, servicing errors or other technicalities,” they said in a statement.

Department leaders also promised to devote extra attention to members of the military.

Starting in 2022, staff will match department data with other federal databases to ensure that all federal workers (including troops) automatically qualify for the debt relief. That means those individuals could see their debts suddenly erased, without any work on their part.

“Military service members and other federal employees devote themselves to serving the United States, and we should make it as easy as possible for them to get [financial relief],” the department announcement stated.

The changes also include broadening the types of federal loans previously eligible for forgiveness and relaxing strict monthly repayment rules.

Until now, roughly 16,000 individuals have qualified for the Public Service Loan Forgiveness program since it was launched in 2007.

Education Department officials said about 22,000 individuals are expected to benefit from the changes immediately, erasing about $1.74 billion in debt. Another 27,000 will need to certify their employment to get immediate relief. The new rules will be in effect through October 2022, under emergency provisions. However, officials are expected to codify many of the changes over the coming year.

Navy Begins Red Hill Shaft Recovery Operations

JOINT BASE PEARL HARBOR-HICK-AM, Hawaii — The U.S. Navy began full-scale operation of pumping and granular activated carbon (GAC) filtration of groundwater from the Navy's Red Hill Shaft.

This is a vital step forward in the process for containing and removing contamination within the shaft as part of the Red Hill Shaft Recovery and Monitoring Plan.

The Interagency Drinking Water System Team (IDWST) finalized the plan last week, in consultation with the Hawaii Department of Land and Natural Resources, University of Hawaii, and other community stakeholders. The IDWST includes Hawaii Department of Health (DOH), the U.S. Environmental Protection Agency, Army and Navy.

The plan includes actions to pump and filter contaminated groundwater from the Navy's Red Hill Shaft to reduce spread of contamination and protect plants and wildlife. It will also help the IDWST better understand movement and contamination of groundwater.

Each day, the Navy is pumping up to five million gallons of groundwater from the Red Hill Shaft. This creates a capture zone within the aquifer to reduce the spread of groundwater contamination. To remove contaminants inside the well, the Navy will use discharging pumps and an array of booms and absorbent pads. The Navy's goal is to contain contamination near the shaft and prevent further contamination of the aquifer.

After the water is pumped from the well, it passes through the GAC filtration system before being discharged into Halawa Stream. The purpose of the GAC filtration system is to filter (or clean) the discharged water so it does not pose a threat to human health or the environment. As the water passes through the GAC filtration system, it is closely monitored for contaminants in real time. The Navy will also send water samples to a certified laboratory for testing.

The maximum daily amount of water to be discharged into Halawa Stream will be less than one percent of the amount of water in the stream during peak rainwater flow.

The Hawaii Department of Health (DOH) approved a National Pollutant Discharge Elimination System (NPDES) permit Jan. 27, allowing these operations to take place. In response, the Department of Education announced changes to "restore the promise" of the program and "make it easier for members of the military to get credit toward loan forgiveness while they serve."

While the loan forgiveness program is not solely focused on service members, they make up a significant portion of program recipients.

Officials said at least 17,000 current troops will benefit from the new rules, but the number could be much higher as staff combs through various loan accounts to see how many of the estimated 550,000 borrowers expected to benefit had some military service.

Under current rules, loan forgiveness recipients must either work full-time at a government job — federal, state, local and military posts are all included — or a not-for-profit, non-partisan organization such as the Peace Corps. It covers individuals who have direct loans or previously consolidated federal student loans and have been paying down the debt for the last 10 years.

The rationale behind the program is to give those public servants financial relief, rather than force them to leave those public service jobs to erase their debts.

But in the past, rules surrounding those repayments required strict monthly payments and covered certain types of loans. Earlier this week, 60 Minutes profiled multiple service members who paid back tens of thousands of dollars over a decade, only to discover at the end that their loan forgiveness applications had been rejected on technicalities.

Education Department officials Wednesday’s announcement is designed to prevent that from happening again.

"These changes are important steps toward a better and stronger PSLF program, one that will move away from the current situation in which too few borrowers receive forgiveness, and too many do not receive credit for years of payments they made because of complicated eligibility rules, servicing errors or other technicalities," they said in a statement.

Department leaders also promised to devote extra attention to members of the military.

Starting in 2022, staff will match department data with other federal databases to ensure that all federal workers (including troops) automatically qualify for the debt relief. That means those individuals could see their debts suddenly erased, without any work on their part.

"Military service members and other federal employees devote themselves to serving the United States, and we should make it as easy as possible for them to get [financial relief]," the department announcement stated.

The changes also include broadening the types of federal loans previously eligible for forgiveness and relaxing strict monthly repayment rules.

Until now, roughly 16,000 individuals have qualified for the Public Service Loan Forgiveness program since it was launched in 2007.

Education Department officials said about 22,000 individuals are expected to benefit from the changes immediately, erasing about $1.74 billion in debt. Another 27,000 will need to certify their employment to get immediate relief. The new rules will be in effect through October 2022, under emergency provisions. However, officials are expected to codify many of the changes over the coming year.

CRISIS: Red Cross seeks blood product donations

The American Red Cross is facing a national blood crisis—its worst blood shortage in over a decade, posing a concerning risk to patient care. Doctors have been forced to make difficult decisions about who receives blood transfusions and who will need to wait until more products become available. Blood and platelet donations are critically needed to help prevent further delays in vital medical treatments. Look for your nearest blood facility and make a donation.

What You Need to Know

Find a Drive. https://www.redcrossblood.org

Requirements by Type of Donation

To ensure the safety of both patients and donors, these are some of the requirements donors must meet to be eligible to donate blood based on donation type. To explore a list of eligibility information, go to www.redcrossblood.org/donate-blood/how-to-donate/more-information, got to www.redcrossblood.org/donate-blood/how-to-donate/more-information.

Whole Blood Donation

Donation frequency: Every 56 days, up to six times per year.
You must be in good health and feeling well.
You must be at least 16 years old in most states.
You must weigh at least 110 lbs.

Power Red Donation

Donation frequency: Every 112 days, up to three times per year.
You must be in good health and feeling well.
Male donors must be at least 17 years old in most states, at least 5'1" tall and weigh at least 130 lbs.
Female donors must be at least 19 years old, at least 5'5" tall and weigh at least 150 lbs.

AB Elite Plasma Donation

Donation frequency: Every 28 days, up to 13 times per year.
You must have type AB blood.
You must be in good health and feeling well.
You must be at least 17 years old.
You must weigh at least 110 lbs.

Platelet Donation

Donation frequency: Every 7 days, up to 24 times per year.
You must be in good health and feeling well.
You must be at least 17 years old in most states.
You must weigh at least 110 lbs.

Fraud and older adults — what’s your story?

Every year millions of people report fraud, scams, and bad business practices to the Federal Trade Commission (FTC). These stories help the agency better understand how fraud affects each community. FTC offers information and advice for some of these communities, and this article will focus on suspicions having an impact on older adults.

Scammers are using social media for investment, romance, and online shopping scams. More than one in four people who reported losing money to fraud from 2020 - 2021 said it started on social media with an ad, a post, or a message.

The overwhelming majority of fraud reports filed with the FTC’s Consumer Sentinel Network by people 60+ didn’t indicate any monetary loss. What’s more, consumers in that age group spotted fraud and reported it before losing any money at nearly twice the rate of people between 20 and 59. What that tells us. Even if they were able to spot scams before losing money, older consumers have heeded the law enforcement call to report fraud. Consumers of all ages can follow their example by reporting their scam stories at ftc.gov/complaint.

By Lesley Fair, FTC Consumer & Business Education

The FTC just sent a report to Congress called Protecting Older Consumers 2018–2019. The report suggests steps to take to help protect older consumers from fraud. But the evidence also shows a thing or two everyone else can learn from them. Check out the sometimes surprising findings in this year’s report at https://ftc.gov/reports/protecting-older-consumers-2018-2019-report.

Older adults were the least likely of any age group to report losing money to scams. The overwhelming majority of fraud reports filed with the FTC’s Consumer Sentinel Network by people 60+ didn’t indicate any monetary loss. Older adults were the least likely of any age group to report losing money to scams.

What that tells us. Rather than general reminders to “be careful,” offer older consumers targeted tips about tech support scams, bogus prize promotions, and scammers who impersonate family and friends. In addition, talk to older friends and family about specific strategies for reducing the number of unwanted calls and spotting when a phone fraudster is on the line. And tell older consumers within your circle that if anyone contacts them and insists on payment by a wire transfer or gift card, it’s a scam.

Protecting Older Consumers 2018–2019: A Report of the Federal Trade Commission includes details about the cases the FTC has brought to protect older consumers and includes links to new topics in Pass It On, an FTC resource you can use to help educate family and friends about fraud.

Looking at the data: Scams and older consumers

Looking at the data: Scams and older consumers

The FTC Consumer & Business Education

The FTC just sent a report to Congress called Protecting Older Consumers 2018–2019. The report suggests steps to take to help protect older consumers from fraud. But the evidence also shows a thing or two everyone else can learn from them. Check out the sometimes surprising findings in this year’s report at https://ftc.gov/reports/protecting-older-consumers-2018-2019-report.

Older adults were the least likely of any age group to report losing money to scams. The overwhelming majority of fraud reports filed with the FTC’s Consumer Sentinel Network by people 60+ didn’t indicate any monetary loss. What’s more, consumers in that age group spotted fraud and reported it before losing any money at nearly twice the rate of people between 20 and 59. What that tells us. Even if they were able to spot scams before losing money, older consumers have heeded the law enforcement call to report fraud. Consumers of all ages can follow their example by reporting their scam stories at ftc.gov/complaint.

But when older consumers experience consumer fraud, their reported financial losses were greater than what younger consumers reported. Compared to 2017 numbers, reported median losses among consumers 60 and over increased, and the increase was particularly large for people 80+.

What that tells us. In addition to ongoing FTC law enforcement, sharing information with older consumers about scams is still very important. Exposed to Scams: What SeparatesVictims from Non-Victims?, a report from the FINRA Investor Education Foundation, the BBB Institute for Marketplace Trust, and the Stanford Center on Longevity, suggests that people are much less likely to lose money on a scam they encounter if they’ve heard about it before. So spread the word about scams you hear about in the news or from the FTC. Even though older consumers are less likely to report losing money to scams, certain scams are more likely to strike them. For example, older adults were more likely than younger consumers to report losing money on tech support scams, prize, sweepstakes & lottery scams, and family & friend impersonation. Phone scams did the most financial damage. And while gift cards became the payment of choice for scammers, wire transfers still take the top spot for total dollars paid.

What that tells us. Rather than general reminders to “be careful,” offer older consumers targeted tips about tech support scams, bogus prize promotions, and scammers who impersonate family and friends. In addition, talk to older friends and family about specific strategies for reducing the number of unwanted calls and spotting when a phone fraudster is on the line. And tell older consumers within your circle that if anyone contacts them and insists on payment by a wire transfer or gift card, it’s a scam.

What that tells us. In addition to ongoing FTC law enforcement, sharing information with older consumers about scams is still very important. Exposed to Scams: What Separates Victims from Non-Victims? is available for free from the FINRA Investor Education Foundation, the BBB Institute for Marketplace Trust, and the Stanford Center on Longevity, showing that people are much less likely to lose money on a scam they encounter if they’ve heard about it before. So spread the word about scams you hear about in the news or from the FTC.

Every year millions of people report fraud, scams, and bad business practices to the Federal Trade Commission (FTC). These stories help the agency better understand how fraud affects each community. FTC offers information and advice for some of these communities, and this article will focus on scams having an impact on older adults. Scammers are using social media for investment, romance, and online shopping scams. More than one in four people who reported losing money to fraud from 2020 – 2021 said it started on social media with an ad, a post, or a message. The most money was lost to cryptocurrency. The median reported loss across all romance scam reports was $2,400 last year, but the amount was higher among older adults. People 70+ and over reported the highest median losses at $9,000.

Imposters posing as Amazon workers tricked people with messages about suspicious activity or unauthorized purchases on their accounts. Among people age 60 and over who reported the calls in 2020-2021, the median reported loss was $1,500, compared to $814 for people under age 60.

FRAUD AND OLDER ADULTS - WHAT’S YOUR STORY?

If you spot one of these — or another — scam, please report it to the FTC at ReportFraud.ftc.gov. It’s easy to report and the information you give helps protect your community. Want more consumer protection news? Read common scam stories and sign up for email updates.
House Resolution 6990 - To award posthumously a Congressional Gold Medal to Donald H. Dunagan in recognition of his acts of valor while a member of the United States Navy during World War II.

Sponsor: Rep. Kweisi Mfume (D-MD)

Latest Action: Veterans' Affairs Committee on March 18.

S.952 (also H.R. 2372) - The Presumptive Benefits for War Fighters Exposed to Burn Pits and Other Toxins Act

Latest Action: Senate Committee on Veterans' Affairs.

House Resolution 6543 - Restore Veterans' Compensation Act of 2022

Sponsor: Rep. Ruben Gallego (D-AZ)

Latest Action: Committees on Armed Services and Veterans' Affairs.

H.R.511 - To recognize the Memorial of the National Navy UDT-SEAL Museum in Fort Pierce, Florida, as the official national memorial, memorial garden, and K9 memorial, respectively, of Navy SEALs and their predecessors.

Sponsor: Rep. Brian Mast (R-FL)

Latest Action: Introduced in House on Aug. 27, 2021 and referred to House Armed Services Committee.

H.R.7158 - To amend title 38, United States Code, to authorize the Secretary of Veterans Affairs to enter into contracts and agreements for the payment of care in non-Department of Veterans Affairs medical foster homes for certain veterans who are unable to live independently, and for other purposes.

Sponsor: Rep. Clay Higgins (R-LA)

Latest Action: Introduced 03/18/2022

Latest Action: Veterans' Affairs Committee hearings held on April 28. Establishes a presumption of service-connection for specified diseases associated with exposure to burn pits (an area used for burning solid waste in open air without equipment) and other toxins by veterans who were awarded specified medals on or after Aug. 2, 1990. Under a presumption of service-connection, specific conditions diagnosed in certain veterans are presumed to have been caused by the circumstances of military service. Health care benefits and disability compensation may then be awarded. Under the bill, if the Department of Veterans Affairs (VA) receives a written petition to add a disease to the list, it must request a determination by the National Academies of Sciences, Engineering, and Medicine as to whether there is a positive association between the exposure to a covered toxin and the occurrence of the disease in humans. The bill makes disability or death of certain employees from specified diseases compensable as a work injury. Specifically, such employees are those who were employees of the Department of State, the Department of Defense, or an element of the intelligence community.

H.R.7109 - To amend the Service members Civil Relief Act to require public lodging establishments to waive minimum age requirements for members of the Armed Forces.

Sponsor: Rep. Vicky Hartzler (R-MO)

Latest Action: House - 03/17/2022

---

**SOLIDARITY OF THE SEA**

Left, Operations Specialist 3rd Class Sergei Serghis, from Kerch, Ukraine, operates a radar on the bridge of the Nimitz-class aircraft carrier USS Harry S. Truman (CVN 75). The Harry S. Truman Carrier Strike Group is on a scheduled deployment in the U.S. 6th Fleet area of operations in support of U.S., allied and partner interests in Europe and Africa. Photo by Mass Communication Specialist Seaman Jack Hoppe

---

**From July 2021, Ukrainian President Volodymyr Zelensky, center, and Chargé d'Affaires, Kristina Kvien, right, are shown the bridge of the Arleigh Burke-class guided-missile destroyer USS Ross (DDG 71) by Vice Adm. Eugene Black, commander, U.S. 6th Fleet, left, during the ship's July 4, 2021 port call in Odessa, Ukraine.**

Photo by Mass Communication Specialist 2nd Class Claire Dubois
Ensign Armani Courtney, assigned to the guided-missile destroyer USS The Sullivans (DDG 68), participates in Security Reaction Force-Basic (SRF-B) training, March 3. The Sullivans is deployed to the European theater of operations and participating in a range of maritime activities in support of U.S. 6th Fleet and NATO Allies.
